Maritime Communications

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has adopted a *First Report and Order* which provides an economically competitive and spectrally efficient maritime regulatory environment. Specifically, the Commission adopts amendments to its rules to reclassify international public coast stations as non-dominant common carriers, and allow certain private land mobile services that meet interference protection criteria to operate on public correspondence channels within the marine VHF band. These amendments were necessary in order to subject international public coast stations to a less burdensome regulatory scheme concerning tariff and closure procedures and to provide relief from private land mobile congestion within the VHF band.

EFFECTIVE DATE: August 9, 1995.

FOR FURTHER INFORMATION CONTACT:
Roger S. Noel of the Wireless
Telecommunications Bureau at (202)
418-0680.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *First Report and Order*, adopted April 26, 1995, and released May 26, 1995. The full text of this action is available for inspection and copying during normal business hours in the FCC Reference Center, Room 239, 1919 M Street, NW., Washington, DC. The complete text may be purchased from the Commission's copy contractor, ITS, Inc., (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of First Report and Order

1. In this action, the Commission makes two distinct changes to the rules. First, the Commission reclassifies international public coast stations as non-dominant common carriers. Public coast stations provide common carrier telecommunications service to ship stations, including telephony, telegraphy, data and facsimile services. Because there is significant competition in the marine radio public correspondence market and substitutability of service from cellular and satellite-based services, public coast stations do not possess market power. Therefore, the Commission reclassifies public coast stations as non-dominant in order to subject them to a less burdensome regulatory scheme concerning tariff and closure procedures.

2. Second, the Commission amends the maritime and private land mobile service rules to permit certain land mobile licensees, those eligible under the industrial and land transportation radio service rules, to share marine VHF public correspondence frequencies on a primary basis far from navigable waterways and existing public coast stations. Similarly, sharing will be permitted on a secondary, non-interference basis when the land mobile applicant is located near a navigable waterway, but is far from VHF public coast stations. The Commission currently permits sharing between the maritime and private land mobile service on a case-by-case basis. Based on this experience, the Commission adopts inter-service sharing to increase spectrum efficiency without causing harmful interference to VHF public coast stations. The rules below set forth the minimum distance required from

navigable waterways and existing public coast stations.

3. The rules are set forth at the end of this document.

4. The rules contained herein have been analyzed with respect to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq., and found to contain no new or modified form, information collection, and/or recordkeeping, labeling, disclosure, or record retention requirements and will not increase or decrease burden hours imposed on the public.

5. This *First Report and Order* is issued under the authority of sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r).

Final Regulatory Flexibility Analysis

Reason for Action

The Commission (1) reclassifies VHF public coast stations as non-dominant common carriers, thereby subjecting them to a streamlined regulatory scheme, and (2) authorizes inter-service sharing of certain maritime frequencies in order to reduce private land mobile service frequency congestion in certain geographical areas.

Objectives

We seek to increase efficiency in these radio services and within the commission by (1) streamlining the tariff filing and closure reporting requirements for VHF public coast stations, and (2) authorizing sharing of frequencies between the land mobile and marine radio services. Such changes should reduce unnecessary burdens on the public and administrative costs to the Commission.

Legal Basis

This action is authorized under sections 4(i) and 303(r) of the Communications Act, 47 U.S.C. 154(i) and 303(r).

Reporting, Recordkeeping and Other Compliance Requirements

VHF coast stations will be subject to the streamlined regulatory scheme for non-dominant common carriers.

Federal Rules Which Overlap, Duplicate or Conflict With These Rules

None.

Description, Potential Impact, and Small Entities Involved

The rule amendments pertaining to the inter-service sharing of land mobile

and marine radio service frequencies will increase spectrum efficiency and reduce congestion in certain areas of the country. Because coast stations are not typically owned by small businesses, the reclassification of such carriers as non-dominant will not have a significant impact on a substantial number of small businesses. The reclassification, however, will eliminate for coast stations the regulatory burden of compliance with the tariff and closure requirements that currently apply to dominant common carriers.

Any Significant Alternatives Minimizing the Impact on Small Entities Consistent With the Stated Objectives

None.

(b) Assignment will be made only when VHF frequencies available for

assignment under this Part are unavailable due to congestion, as determined by a certified private land mobile frequency coordinator. Applicants must provide evidence of frequency coordination in accordance with § 90.175.

(c) Station power, as measured at the output terminals of the transmitter, must not exceed 50 watts for base stations and 20 watts for mobile stations. Antenna height (HAAT) must not exceed 122 meters (400 feet) for base stations and 4.5 meters (15 feet) for mobile stations. Such base and mobile stations must not be operated on board aircraft in flight.

(d) The following table, along with the antenna height (HAAT) and power (ERP), must be used to determine the minimum separation required between proposed base stations and each of the following:

(1) Co-channel public coast stations licensed under part 80 of this chapter,

(2) The coastline of any navigable waterway,

(3) Grandfathered public safety licensees operating on 157.35 MHz or 161.85 MHz. Applicants whose exact ERP or HAAT are not reflected in the table must use the next highest figure shown.

(e) In the event of interference, the Commission may require, without a hearing, licensees of base stations authorized under this section that are located within 241 kilometers (150 miles) of an existing, co-channel public coast station, grandfathered co-channel public safety station or an international border to reduce radiated power, decrease antenna height, and/or install directional antennas. Mobile stations must operate only within radio range of their associated base station.

(f) Individual waiver requests to operate on a secondary, non-interference, basis will be considered in cases where the applicant's base station satisfies the requirements of paragraphs (d) (1) and (3) of this section but does not satisfy the requirements of paragraph (d)(2) of this section. All waiver requests must be submitted in accordance with § 1.931 of the chapter. Such secondary operations must cease immediately upon notification by the Commission that the station is causing interference to maritime operations.

4. Section 90.555 is amended by revising two of the service titles in paragraph (a) and by adding eighteen new frequencies entries in numerical order in paragraph (b) to read as follows:

ACTION: Final rule.

SUMMARY: This document substitutes Channel 236C2 for Channel 297C3 at College Station, Texas, and modifies the license of Station KTSR, College Station, Texas, to specify operation on Channel 237C2. In order to accommodate this upgrade, this document also modifies the construction permit of Station KHEN, Caldwell, Texas, to specify operation on Channel 297A. In doing so, it denies a competing request for a Channel 236C2 upgrade at Caldwell, Texas. See 59 FR 44120, published August 26, 1994. The reference coordinates for Channel 236C2 at College Station, Texas, are 30-49-00
