

criteria for implementing specific mitigation actions without further review, or with limited site-specific analysis tiered to the Program EIS.

#### Process to Date

BPA has funded, over the last several years, a number of small demonstration projects under a "model" watershed program. The model watersheds include the Grand Ronde and its subbasins in Oregon, the Tucannon, Pataha, and Asotin in Washington, and the Lemhi, Pahsimeroi, and East Fork Salmon in Idaho. To date, BPA has categorically excluded these model watershed demonstration projects under NEPA. However, with the culmination of planning for many of the model watersheds and potential for expansion of the watershed program to include additional watersheds beyond the model watersheds, BPA has decided to prepare an EIS to discuss the potential cumulative impacts, both positive and negative, of a larger-scope watershed program.

#### Alternatives Proposed for Consideration

Alternatives to be considered in the BPA Watershed Management Program EIS would include alternative standards and guidelines for each management issue addressed. The EIS will also consider a No Action alternative, *i.e.*, program implementation without defined program-wide standards and guidelines.

#### Identification of Environmental Issues

The environmental issues associated with fish mitigation activities include changes in land use, vegetation patterns, fish and wildlife populations, recreational opportunities, and water use and quality.
