

EPA Energy Star program for office equipment will likely meet the requirements of Section 125 of EPA Act if it is fully developed and implemented. The Department will continue to monitor, evaluate and provide periodic assessments of the progress in developing the voluntary testing and labeling program for office equipment. DOE will also work with the industry and with EPA to encourage ongoing efforts to monitor energy use, savings, operating practices, and user satisfaction with energy-efficient office equipment in actual use.

In order for the Department to evaluate progress in these areas, close collaboration among ITI, the Department and EPA should be maintained to facilitate exchange of information and program updates. No later than July 15, 1998, the Department must receive data and documentation on the achievements of industry efforts in this area, including information as to whether the above objectives have been met, so that DOE can make its final determination. The Department expects to make a final determination within three years.

Issued in Washington, DC, April 11, 1996.
Christine A. Ervin,

Assistant Secretary, Energy Efficiency and Renewable Energy.
