Background: A Memorandum of Understanding (MOU) was signed in October 1990 and renewed in November 1992 between ATSDR and DOE. The MOU delineates the responsibilities and procedures for ATSDR's public health activities at DOE sites required under sections 104, 105, 107, and 120 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"). These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the

public; and other health-related activities such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

In addition, under an MOU signed in December 1990 with DOE, the Department of Health and Human Services (HHS) has been given the responsibility and resources for conducting analytic epidemiologic investigations of residents of communities in the vicinity of DOE facilities, workers at DOE facilities, and other persons potentially exposed to radiation or to potential hazards from non-nuclear energy production and use. HHS delegated program responsibility to CDC.

Purpose: The Subcommittee will receive updates from the Inter-tribal Council on Hanford Health Projects; reports from the Outreach, Public Health Activities, and Health Studies Work Groups; and address other issues and topics as necessary.

Matters to be Discussed: The Subcommittee will consider a number of items including ATSDR's medical monitoring options, ATSDR's planning for a medical assistance program, and solicitation of concerns the Subcommittee wants ATSDR and CDC to address.

Agenda items are subject to change as priorities dictate.
