Abstract: 1. The Secretary of the Interior issued regulations at 30 CFR 203.50 which contain provisions to reduce or eliminate any royalty or net profit share on an entire leasehold or on any deposit, tract, or portion thereof that is segregated for royalty purposes, in order to promote increased production on a lease area through direct, secondary, or tertiary recovery means.

2. In order for MMS to determine whether to eliminate royalty or net profit share, the lessee must request relief filing an application prepared in accordance with § 203.50. The application must contain sufficient scientific, geological, engineering, and financial information to permit MMS to evaluate the need for relief.

1. As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)), MMS specifically solicits responses to the following: (a) Is the proposed collection of information necessary for the proper performance of MMS functions and will it be useful? (b) Are the estimates of the burden of the proposed collection reasonable? (c) Do you have any suggestions that would enhance the quality, clarity, or usefulness of the information to be collected? (d) Is there a way to minimize the information collection burden on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other forms of information technology?

2. In addition, the Paperwork Reduction Act requires agencies to estimate the total annual cost burden to respondents or recordkeepers resulting from the collection of information. MMS needs your comments on this item. Your response should split the cost estimate into two components: (a) a total capital and start-up cost component; and (b) an annual operation and maintenance and purchase of services component. The estimates should take into account costs associated with generating, maintaining, and disclosing or providing the information. Include descriptions of methods used to estimate major cost factors including system and technology acquisition, expected useful life of capital equipment, the discount rate(s), and the time period over which costs will be incurred. Capital and start-up costs include, among other items, preparations for collecting information such as purchasing computers and software, monitoring, sampling, drilling and testing equipment; and record storage facilities. Generally, estimates should not include purchases of equipment or services made: (a) before October 1, 1995; (b) to achieve regulatory compliance with requirements not associated with the information collection; (c) for reasons other than to provide information or keep records for the government; or (d) as part of customary and usual business or private practices.
