

reached 99 years of age, and the destruction of records maintained in the civil file when the records indicate individuals have reached 99 years of age. (Job. No. N1-65-95-03)

(B.) Fingerprint cards and related arrest data in the system are destroyed seven years following notification of the death of an individual whose records is maintained in the system. (Job No. N1-65-95-03)

C. The Archivist has determined that automated FBI criminal identification records (rap sheets) are to be permanently retained. Thus, at the time when paper identification records would have been eligible for destruction, automated FBI criminal identification records are transferred via magnetic tape to NARA.

D. Fingerprint cards submitted by State and local criminal justice agencies are removed from the system and destroyed upon the request of the submitting agencies. The destruction of a fingerprint card under this procedure results in the deletion from the system of all arrest information related to that fingerprint card.

(E.) Fingerprint cards and related arrest data are removed from the Fingerprint Identification Records System upon receipt of Federal court orders for expunctions when accompanied by necessary identifying information. Recognizing lack of jurisdiction of local and State courts over an entity of the Federal Government, the Fingerprint Identification Records System, as a matter of comity, destroys fingerprint cards and related arrest data submitted by local and State criminal justice agencies upon receipt of orders of expunction directed to such agencies by local and State courts when accompanied by necessary identifying information.
