SUPPLEMENTARY INFORMATION: The San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta system) is a critically important part of California's natural environment and economy. In recognition of the serious problems facing the region and the complex resource management decisions that must be made, the state of California and the Federal government are working together to stabilize, protect, restore, and enhance the Bay-Delta system. The State and Federal agencies with management and regulatory responsibilities in the Bay-Delta system are working together as CALFED to provide policy direction and oversight for the process.

One area of Bay-Delta management includes the establishment of a joint State-Federal process to develop long-term solutions to problems in the Bay-Delta system related to fish and wildlife, water supply reliability, natural disasters, and water quality. The intent is to develop a comprehensive and balanced plan which addresses all of the resource problems. This effort, the CALFED Bay-Delta Program (Program), is being carried out under the policy direction of CALFED. The CALFED Bay-Delta Program is exploring and developing a long-term solution for a cooperative planning process that will determine the most appropriate strategy and actions necessary to improve water quality, restore health to the Bay-Delta ecosystem, provide for a variety of beneficial uses, and minimize Bay-Delta system vulnerability. A group of citizen advisors representing California's agricultural, environmental, urban, business, fishing, and other interests who have a stake in finding long term solutions for the problems affecting the Bay-Delta system has been chartered under the Federal Advisory Committee Act (FACA) as the Bay-Delta Advisory Council (BDAC) to advise CALFED on the program mission, problems to be addressed, and objectives for the CALFED Bay-Delta Program. BDAC provides a forum to help ensure public participation, and will review reports and other materials prepared by CALFED staff. BDAC has established a subcommittee called the Ecosystem Roundtable to provide input on annual work plans to implement ecosystem restoration projects and programs.

Minutes of the meetings will be maintained by the CALFED Bay-Delta Program, Suite 1155, 1416 Ninth Street, Sacramento, CA 95814, and will be available for public inspection during

regular business hours, Monday through Friday within 30 days following the meeting.

Dated: March 21, 1997.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Advanced Target/Threat Assessment Code Project

Notice is hereby given that, on March 6, 1997, pursuant to § 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. § 4301 *et seq.* ("the Act"), the Advanced Target/Threat Assessment Code ("ATTAC") Project has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to § 6(a) of the Act, the identities of the parties are: Nuclear Metals, Inc., Concord, MA; Southwest Research Institute, San Antonio, TX; and TNO Prins Maurits Laboratory, Rijswijk, NETHERLANDS.

The area of planned activity is to create an Advanced Target/Threat Assessment Code ("ATTAC") to provide armor engineers and vulnerability analysts with a computer tool which can be used to perform detailed assessment of armor systems at all stages of development but utilizing advanced analytical penetration/perforation modeling procedures using a PC platform with extensive graphics capabilities by merging PMC software with penetration models previously developed by Southwest Research Institute.

Membership in the ATTAC Project will remain open and the ATTAC will file additional written notifications disclosing all changes in membership.
