## Bureau of Reclamation

### Josephine County Water Management Improvement, Fish Passage Improvements, Savage Rapids Dam, Oregon

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice of availability of record of decision.

**SUMMARY:** This notice is issued under authority of the National Environmental Policy Act of 1969. In 1988 Reclamation initiated the Josephine County Water Management Improvement Study in response to requests by Josephine County and the Grants Pass Irrigation District (GPID). A record of decision (ROD), in which Reclamation concluded its study of alternatives to improve salmon and steelhead passage, was signed on March 14, 1997. The ROD identified the Preferred Alternative, described in the planning report/final environmental statement (PR/FES), as the most efficient and environmentally sound alternative for providing safe salmon and steelhead passage at Savage Rapids Dam. Reclamation recommended the Preferred Alternative of the GPID, but it appears that they now wish to pursue a different course of action. In view of this, Reclamation will not pursue congressional action to authorize or fund implementation of the Preferred Alternative identified in the PR/FES.

**ADDRESSES:** Copies of the ROD may be requested from the following locations:  
Bureau of Reclamation, Pacific Northwest Region, 1150 North Curtis Road, Boise, ID 83706-1234  
Bureau of Reclamation, Lower Columbia Area Office, 825 NE Multnomah, Suite 1110, Portland, OR 97232

**FOR FURTHER INFORMATION CONTACT:** J. Eric Glover (503) 872-2795.

**SUPPLEMENTARY INFORMATION:** The primary objectives of the Josephine County Water Management Improvement Study were to (1) identify a permanent solution to salmon and steelhead passage problems at Savage Rapids Dam and (2) help resolve conflicts over water uses in Josephine County. A PR/FES focusing only on salmon and steelhead passage concerns at the dam and the associated diversion facilities was filed on August 30, 1995. In addition to the no action alternative, two action alternatives were evaluated in the PR/FES. The Pumping Alternative was identified as the Preferred Alternative and consists of three parts: (1) Replacement of GPID pumping and diversion facilities at the dam with two new pumping plants, one each on the

north and south sides of the river; (2) removal of the dam and appurtenant structures and restoration of the sites; and (3) forgiveness of remaining debt to the Federal Government owed by GPID.

Dated: March 20, 1997.

Regional Director.
