A request for a hearing may not rest upon mere allegations or denials, but must present specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for a hearing that there is no genuine and substantial issue of fact that precludes the withdrawal of approval of the applications, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person who requests the hearing, making findings and conclusions, and denying a hearing.

All submissions pursuant to this notice of opportunity for a hearing are to be filed in four copies. Except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, the submissions may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Consensus Development Conference on Breast Cancer Screening For Women Ages 40-49

Notice is hereby given of the NIH Consensus Development Conference on "Breast Cancer Screening For Women Ages 40-49," which will be held January 21-23, 1997, in the Natcher Conference Center of the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892. The conference begins at 8:30 a.m. on January 21, at 8 a.m. on January 22, and at 9 a.m. on January 23.

A number of randomized clinical trials have shown clearly that early detection of breast cancer by mammography, with and without clinical breast examination at regular intervals ranging from 1 year to 33 months, reduces breast cancer mortality in women ages 50-69 by about a third. However, the picture is not as clear for women 40-49 years of age, and worldwide experts continue to examine the data regarding the use of mammography in this age group. Follow-up data from the Swedish, Canadian, Edinburgh (U.K.), and health Insurance Plan of New York clinical trials will be presented at the conference in an attempt to help clarify these issues.

This conference will bring together the investigators who have conducted the randomized clinical trials, epidemiologists, statisticians, radiologists, oncologists, and other experts, as well as representatives of the public, to present and discuss the latest data and data analyses.

After 1½ days of presentations and audience discussion, an independent, no-Federal consensus panel will weigh the scientific evidence and write a draft statement that it will present to the audience on the third day. The consensus statement will address the following key questions:

- Is there a reduction in mortality from breast cancer due to screening women ages 40 to 49 with mammography, with or without physical examination? If so, how large is the benefit? How does it change with age?
- What are the risks associated with screening women ages 40-49 with mammography and with physical examination?

Are there other benefits? If so, what are they? How do they change with age?

- What is known about how the benefits and risks of breast cancer screening differ based on known risk factors for breast cancer?

—What are the directions for future research?

The primary sponsors of this conference are the National Cancer Institute and the NIH Office of Medical Applications Research. The conference is cosponsored by the National Institute on Aging, the NIH Office of Research on Women's Health, and the Centers for Disease Control and Prevention.

Advance information on the conference program and conference registration materials may be obtained from Hope Levy Cott, Technical Resources International, Inc., 3202 Tower Oaks Blvd., Suite 200, Rockville, Maryland 20852, (301) 770-3153, or by sending e-mail to confdept@tech-res.com.

The consensus statement will be submitted for publication in professional journals and other publications. In addition, the statement will be available beginning January 23, 1997, from the NIH Consensus Program Information Center, P.O. Box 2577, Kensington, Maryland 20891, phone 1-888-NIH-CONSENSUS (1-888-644-2667), and from the NIH Consensus Development Program site on the World Wide Web at <http://consensus.nih.gov>.
