Corps of Engineers

Notice of Availability for the Draft Supplemental Environmental Impact Statement and General Reevaluation Report of the Green Brook Flood Control Project in the Green Brook Sub-Basin of the Raritan River Basin, Middlesex, Somerset, and Union Counties in the State of New Jersey

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of availability.

SUMMARY: The Army Corps of Engineers, New York District, in coordination with the project sponsor, the New Jersey Department of Environmental Protection, has conducted a General Reevaluation Study of an authorized flood protection project in the Green Brook Sub-Basin of the Raritan River in New Jersey. A supplement to the 1980 Final Environmental Impact Statement has been prepared in association with the Reevaluation Study. Public Information meetings are scheduled for January 1997.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed actions, Feasibility Study, and DSEIS can be addressed to Mr. Bill Richardson, New York District Army Corps of Engineers, ATTN: CENAN-PL-ES, 26 Federal

Plaza, New York, NY 10278-0090, (212) 264-1275.

SUPPLEMENTARY INFORMATION:

Background

1. The Green Brook Sub-Basin is a component of the Raritan River drainage basin in north central New Jersey. The Green Brook Sub-Basin has a 65 square mile watershed. The Sub-Basin is located between the Watchung Mountains and the Raritan River in Middlesex, Somerset, and Union Counties.

2. In response to resolutions of the United States Senate Public Works Committee adopted 15 September 1955 and 10 July 1972 to adopt recommendations for flood control, the U.S. Army Corps of Engineers, New York District prepared a feasibility report and a final environmental impact statement in August 1980. A project similar to "Plan A" as described in the 1980 feasibility study was authorized for construction under the Water Resources Development Act of 1986.

3. The flood problems of the Green Brook Sub-Basin result from a combination of natural hydrologic and hydraulic features coupled with dense development within the floodplains. The Green Brook flows southwest from the slopes of the Watchung Mountains. The path of the streams within the sub-basin flow from relatively undeveloped mountains through a broad flat floodplain which is largely suburban and industrialized. Streams included in the study are: Ambrose Brook, Bound Brook, Bonygutt Brook, Municipal Brook, Stony Brook, Blue Brook, Cedar Brook, and Middle Brook. Flood damages in the tri-county basin are quite severe due to the level of development within the sub-basin. Notable storms which have caused flood conditions in the sub-basin occurred in May 1968, August 1971, August 1973, July 1975, September 1979, July 1984, and October 1996.

4. The Draft Supplemental Environmental Impact Statement (DSEIS) describes the impacts of the proposed project on environmental and cultural resources in the study area. The DSEIS also applies guidelines issued by the Environmental Protection Agency, under the authority of the Clean Water Act of 1977 (Public Law 96-217). An evaluation for the proposed actions on the waters of the United States was performed pursuant to the guidelines of the Administrator, U.S. Environmental Protection Agency, under authority of Section 404 of the Clean Water Act. The results of the evaluation are presented in the DSEIS.

5. This Notice of Availability is being sent to organizations and individuals known to have an interest in the project. Please bring this notice to the attention of any other individuals with an interest in this matter.
