

Actions Since Issuance of the AD

Since the issuance of AD 97-02-09, the FAA has become aware of the fact that certain references made to the amendment number of AD 93-01-14, which appeared throughout the preamble of AD 96-02-09, its amendatory language, and the rule itself, were incorrect. The referenced amendment number that appeared in the published version of the AD was "amendment 39-8368;" however, the correct amendment number correlating to AD 93-01-14 is "amendment 39-8468."

Corrections Necessary to the Current AD

The FAA has determined that it is appropriate to take action to correct AD 97-02-09 by revising all references to the amendment number of AD 93-01-14 to specify "amendment 39-8468." Since AD 97-02-09 supersedes AD 93-01-14, this correction is necessary in order to ensure that the proper amendment number is removed from the regulations as a result of this supersedure.

Action is taken herein to correct the error and to correctly add the AD as an amendment to § 39.13 of the Federal Aviation Regulations (14 CFR 39.13). The effective date of the rule remains March 4, 1997.

Since no other part of the regulatory information has been changed, the final rule is not being republished.

§ 39.13 [Corrected]

In the issue of January 28, 1997, beginning in the third column of page 3989 and continuing to the first column of page 3990, the amendatory language, as well as the introductory text of the rule that specifies pertinent agency numbers and the airplane manufacturer, are corrected to read as follows:

* * * * *

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-6433 (55 FR 601, January 8, 1990); and by removing amendment 39-8468 (58 FR 5574, January 22, 1993); and by adding a new airworthiness directive (AD), amendment 39-9894, to read as follows:

97-02-09 Boeing: Amendment 39-9894, Docket 95-NM-223-AD. Supersedes AD 90-02-19, amendment 39-6433; and supersedes AD 93-01-14, amendment 39-8468.

SUPPLEMENTARY INFORMATION: History

On November 20, 1996, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing a Class D airspace area at Victorville, CA (61 FR 59040). This action will provide adequate controlled airspace to accommodate IFR operations at Southern California International Airport, Victorville, CA.

Class D airspace designations are published in paragraph 5000 of FAA Order 7400.9D dated September 4, 1996, and effective September 16, 1996, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designations listed in this document will be published subsequently in this Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes Class D airspace area at Victorville, CA. The extension of Southern California Air Traffic Control Tower operating hours has made this action necessary. The effect of this action will provide adequate controlled airspace for IFR operations at Southern California International Airport, Victorville, CA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 10034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
