

SUMMARY: The Defense Science Board Task Force on Open Systems will meet in closed session on April 7-8 and May 6-7, 1998 at Strategic Analysis, Inc., 4001 N. Fairfax Drive, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense through the Under Secretary of Defense for Acquisition and Technology on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will examine the benefits of, criteria for, and obstacles to the application of an open systems approach to weapon systems, and make recommendations on revisions to DoD policy, practice, or investment strategies that are required to obtain maximum benefit from adopting open systems. The Task Force will examine application to new defense programs, to those that have already made substantial investments in a design, and to those that are already fielded, across the spectrum of weapon systems, not just those heavily dependent on advanced computers and electronics.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II, (1994)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1994), and that accordingly this meeting will be closed to the public.

HOW SYSTEMS OF RECORDS ARE ARRANGED.

Department of the Army records are identified by the directive number which prescribes the records created, maintained and used, and are published in numerical sequence by identification number. For example, a system of records about assignment of military personnel may be found in the 614 series; 'assignments, details and transfers'. Some subjects, such as investigations, are treated as sub-elements of a series, e.g., 'criminal investigations', 'security', and 'military intelligence'.

HOW TO USE THE INDEX GUIDE.

To locate a particular system of records, follow this general guide. The series subject corresponds to the system identification number. For example: medical records for military and civilian
