#### Proposed Projects

1. *Surveillance of Hazardous Substances Emergency Event*—(0923–0008)—Extension—The Agency for Toxic Substances and Disease Registry (ATSDR) is mandated pursuant to the 1980 Comprehensive Environmental Response Compensation and Liability Act (CERCLA), and its 1986

Amendments, The Superfund Amendments and Reauthorization Act (SARA), to prevent or mitigate adverse human health effects and diminished quality of life resulting from the exposure to hazardous substances into the environment. The primary purpose of this activity, which ATSDR has supported since 1992, is to develop, implement, and maintain a state-based surveillance system for hazardous substances emergency events which can be used to: (1) Describe the distribution of the hazardous substance releases; (2) describe the public health consequences (morbidity, mortality, and evacuations) associated with the events; (3) identify risk factors associated with the public health consequences; and (4) propose strategies to reduce future public health consequences. The study population will consist of all hazardous substance nonpermitted acute releases within the 13 states (Alabama, Colorado, Iowa, Minnesota, Mississippi, Missouri, New York, North Carolina, Oregon, Rhode Island, Texas, Washington, Wisconsin) participating in the surveillance system.

Until this system was developed and implemented, there was no national public health-based surveillance system to coordinate the collation, analysis, and distribution of health data to public health practitioners. It was necessary to establish this national surveillance system which describes the impact of hazardous substances emergencies on the health of the population of the United States. The data collection form will be completed by the state health department HSEES coordinator using information provided by a variety of sources including environmental protection agencies, police, firefighters, emergency response personnel; or researched by the HSEES coordinator including census data, material safety data sheets, and chemical handbooks. There is no cost to respondents.

We are requesting a 3-year extension.

Respondents	Number of respondents	Number of responses/ respondent	Avg burden/ response (in hrs)	Total burden (in hrs)
State coordinator .....	13 states .....	332	1	4,316

2. *Long Term Health Effects of Methyl Parathion in Children*—a Follow-Up Study—New—The Agency for Toxic

Substances and Disease Registry (ATSDR) is mandated pursuant to the 1980 Comprehensive Environmental

Response Compensation and Liability Act (CERCLA), and its 1986 Amendments, The Superfund
