DEPARTMENT OF LABOR

Employment and Training Administration

[NAFTA-01967]

University Technical Services, Incorporated, University Energy, Canton, New York; Amended Negative Determination Regarding Eligibility To Apply for NAFTA-Transitional Adjustment Assistance

In accordance with Section 250(A), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974 (19 U.S.C. 2273), the Department of Labor issued a Certification for NAFTA Transitional Adjustment Assistance on November 28, 1997, applicable to all workers of University Technical Services, Incorporated, San Diego, California. The notice was published in the **Federal Register** on June 13, 1997 (62 FR 32376).

At the request of the State agency, the Department reviewed the negative determination for workers of the subject firm. New findings show that the Department incorrectly identified the subject firm location. The investigation conducted for the subject firm was conducted on behalf of workers engaged in providing operations and maintenance services for electricity generation located in Canton, New York. San Diego, California is the Administrative Services office of the subject firm and is not the subject of the

investigation. The Department is amending the negative determination to correctly identify the city and state to read Canton, New York.

Conclusion

After careful review, I determine that all workers at University Technical Services, Incorporated, Canton, New York are denied eligibility to apply for NAFTA-TAA under Section 250 of the Trade Act of 1974.

Signed at Washington, D.C. this 23rd day of December, 1997.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-443]

North Atlantic Energy Service Corporation, Seabrook Station; Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by Petition dated December 18, 1997, Ms. Jane Doughty (or Petitioner), representing The Seacoast Anti-Pollution League, has requested that the U.S. Nuclear Regulatory Commission take action with regard to Seabrook Station. Petitioner requests that the operating license for the Seabrook Station be suspended until such time as a thorough root cause analysis of the reasons underlying the development of leaks in piping in the "B" train of the residual heat removal (RHR) system is conducted. The leakage was reported by the Licensee on December 5, 1997.

As the basis for this request, Petitioner states that there have been past allegations of improper welding practices and substandard piping at Seabrook Station and further requests that the investigation of the RHR system pipe leakage include findings related to these past allegations.

The request is being treated pursuant to 10 CFR 2.206 of the Commission's regulations. The request has been referred to the Director of the Office of Nuclear Reactor Regulation. As provided by Section 2.206, appropriate action will be taken on this Petition within a reasonable time.

By letter dated January 15, 1998, the Director denied Petitioner's request to delay restart of the reactor at Seabrook Station, Unit 1, until all such actions requested by the Petition are taken.

A copy of the Petition is available for inspection at the Commission's Public Document Room at 2120 L Street, NW., Washington, DC 20555-0001 and at the local public document room located at Exeter Public Library, Founders Park, Exeter, NH 03833.

Dated at Rockville, Maryland, this 15th day of January 1998.
