**Proposed Information Collection Request Submitted for Public Comment and Recommendations: Preparation and Maintenance of Accurate and Up-to-date Certified Mine Maps for Surface and Underground Coal Mines, Submittal of Underground Mine Closure Maps, and Notification of MSHA Prior to Opening New Mines or the Reopening of Inactive or Abandoned Mines**

**ACTION:** Notice.

**SUMMARY:** The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly

understood, and the impact of collection requirements on respondents can be properly assessed.

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to the Record of Mine Closure addressed in 30 CFR 75.1204; the inclusion of standards requiring MSHA notification and inspection prior to mining when opening a new mine or reopening an inactive or abandoned mine addressed in 30 CFR 75.373 and 75.1721; and, the inclusion of standards requiring underground and surface mine operators to prepare and maintain accurate and up-to-date mine maps addressed in 30 CFR 75.1200, 75.1200-1, 75.1201, 75.1202, 75.1202-1, 75.1203, 77.1201 and 77.1202. MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,
