FOR FURTHER INFORMATION CONTACT: Jim Glock, Groundfish Fishery Management Coordinator; telephone: (503) 326-6352.

SUPPLEMENTARY INFORMATION: The purpose of the GMT meeting is to develop a work plan for 1999 and to prepare technical advice and reports to support Council decisions throughout the year. Specific agenda items will include: (1) appoint representatives to track assessments in the stock assessment review process; (2) prepare a work plan for 1999 GMT activities; (3) review methodology for developing inseason catch projections and potential

open access trip limit adjustments; (4) evaluate data and analysis requirements related to lingcod and rockfish allocation and management; (5) review program cost estimates for an observer program; (6) review new information related to the status of the Pacific whiting stock and develop an acceptable biological catch/optimum yield recommendation; and (7) discuss the review of harvest policies.

Starting on Wednesday, February 24, 1999, the GMT and other participants at the harvest policy workshop will hear recent information regarding appropriate harvest rates for various groundfish species. Some investigations indicate current harvest policies ($F_{35}\%$ and $F_{40}\%$) may not adequately protect stocks and may not produce the maximum sustainable yield. This workshop will primarily be a presentation of new information and analysis. A follow-up workshop will be held in March 1999, after which the GMT will prepare specific recommendations and a final report to the Council on appropriate harvest rates.

Although other issues not contained in this agenda may come before this Team for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this notice.
