

Hawaiian monk seals (*Monachus schauinslandi*) for the purposes of enhancing the survival and recovery of the species, and for scientific research. The research seeks to assess the efficiency with which monk seals assimilate and metabolize amino acids and fatty acids from common prey types, and elucidate and monitor how reproductive and metabolic activity of male seals are related.

The permit holder requests authorization to train seals to accept a rectal temperature probe and to take daily temperature measurements on the three monk seals held at Waikiki Aquarium.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

## **POLICY JUSTIFICATION**

### **Israel - AGM-142D Air-to-ground Missiles**

The Government of Israel has requested a possible sale of 41 AGM-142D air-to-ground missiles with data links (including 33 with Z-seeker heads and eight without seeker heads), containers, captive air training missile sets, spare and repair parts, publications and technical data, U.S. Government and contractor technical and logistics personnel services and other related elements of program support. The estimated cost is \$58 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in the Middle East.

This proposed sale of the AGM-142D missile allows Israel to increase its capability to engage high value and hardened/buried targets. The proposed sale will contribute significantly to U.S. strategic and tactical objectives by strengthening the unity of the coalition forces throughout the region. Israel, which already has AGM-142D air-to-ground missiles in its inventory, will have no difficulty absorbing these missiles.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be Lockheed-Martin Electronics and Missiles of Orlando, Florida. There are no offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government representatives or contractor representatives to Israel.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

**Transmittal No. 00-23****Notice of Proposed Issuance of Letter of Offer  
Pursuant to Section 36(b)(1)  
of the Arms Export Control Act****Annex  
Item No. vi****(vi) Sensitivity of Technology:**

1. The AGM-142 stand-off air-to-ground missile hardware and software contain the following sensitive technologies which are classified Confidential: missile seeker hardware, range capability, data link capabilities and launch software (guidance algorithms). The missile has a range of 40-50 NM and can utilize either electro-optical or infrared seekers, and has an 800 lb. warhead. Terminal guidance for the weapons is achieved through the use of data link from either the launch aircraft or another suitable platform.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software involved in this proposed sale, the information could be used to develop countermeasures or systems which could reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that Israel can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
