Notice Pursuant to the National Cooperative Research and Production Act of 1993; Medal, L.P.—High Performance Inorganic—Organic Mixed Matrix Composite Membranes

Notice is hereby given that, on July 7, 1999, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, U.S.C. 4301 *et seq.* ("the Act"), MEDAL, L.P.—High Performance Inorganic—Organic Mixed Matrix Composite Membranes has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties and (2) the nature and objectives of the venture. The notification were filed for the purpose of invoking the Act's provisions

limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties are MEDAL, L.P., Newport, DE; and Chevron Research and Technology Company, Richmond, CA. The nature and objectives of the venture are to conduct research on high-performance inorganic-organic mixed matrix composite membranes for the separation of gases and liquids.

Notice Pursuant to the National Cooperative Research and Production Act of 1993; National Center for Manufacturing Sciences, Inc. ("NCMS"): Advanced Embedded Passives Technology

Notice is hereby given that, on August 5, 1999, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), National Center for Manufacturing Sciences, Inc. ("NCMS"): Advanced Embedded Passives Technology has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership status. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, Electro Scientific Industries, Inc., Portland, OR; and MicroFab Technologies, Inc., Plano, TX have been added as parties to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and National Center for Manufacturing Sciences, Inc. ("NCMS"): Advanced Embedded Passives Technology intends to file additional written notification disclosing all changes in membership.

On October 7, 1998, National Center for Manufacturing Sciences, Inc. ("NCMS"): Advanced Embedded Passives Technology filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on January 22, 1999 (64 FR 3571).

The last notification was filed with the Department on February 3, 1999. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on June 1, 1999 (64 FR 29357).

Notice Pursuant to the National Cooperative Research and Production Act of 1993; Standard MEMS

Notice is hereby given that, on August 3, 1999, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), Standard MEMS has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties are Microscan Systems, Inc., Renton, WA; Maxim Integrated Products, Sunnyvale, CA; Microcosm Technologies, Inc., Cambridge, MA; Optical Micro Systems, Inc., San Diego, CA; Standard MEMS, Hauppauge, NY; and Xerox Corporation, Webster, NY. The nature and objectives of the venture are to develop a manufacturing process and manufacturing infrastructure for Micro-Opto-Electro-Mechanical Systems. The activities of this project will be partially funded by an award from the Advanced Technology Program, National Institute of Standards and Technology, Department of Commerce. The goals of this collaboration are to overcome the barriers that limit the application of low-cost Micro-Opto-Electro-Mechanical Systems (MOEMS) devices in commercial applications in telecommunications, data acquisition, and reprographics. The most important technical barriers are in the areas of packaging, systems partitioning, the optical and mechanical properties of thin film elements, and the assembly and alignment of free-space micro-optical systems. To overcome the technical barriers, Standard MEMS will develop a broadly enabling MOEMS fabrication process, and utilize this process to demonstrate prototype MOEMS devices at Optical Micro-Machines, Microscan Systems, and

Xerox, to enable commercialization of the prototypes following the completion of the ATP collaboration.
