## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 51

[CC Docket No. 96-98; FCC 99-238]

### Revision of the Commission's Rules Specifying the Portions of the Nation's Local Telephone Networks that Incumbent Local Telephone Companies Must Make Available to Competitors

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule; correction.

**SUMMARY:** The Federal Communications Commission published in the **Federal Register** of January 18, 2000 (65 FR 2542) a report and order and final rule, 47 CFR 51.319, specifying which portions of their telephone networks incumbent local exchange carriers must

make available to competitive telecommunications carriers as unbundled network elements. The document, as published, inadvertently removed a portion of 52.319 that the Commission added to the rule previously on January 10, 2000 (65 FR 1331) addressing the obligation of incumbent local exchange carriers to make available the high frequency portion of the local loop as a new network element. The purpose of this correction is to add this portion of the rule back into 47 CFR 51.319.

**DATES:** Effective on April 11, 2000.

**FOR FURTHER INFORMATION CONTACT:** Jodie Donovan-May, Policy and Program Planning Division, Common Carrier Bureau, at (202) 418-1580.

**SUPPLEMENTARY INFORMATION:** The Federal Communications Commission published a report and order and final rule in the **Federal Register** of January 18, 2000 (65 FR 2542). As published, this final rule inadvertently removed paragraph (h). The Commission had added paragraph (h) to § 51.319 in a report and order and final rule published in the **Federal Register** of January 10, 2000 (65 FR 1331). This correction adds paragraph (h) back into the Commission's final rule.

Specifically, in rule FR Doc. 00-1036 published on January 18, 2000 (65 FR 2542), make the following correction:

1. On page 2554, in the third column, in § 51.319, paragraph (h) is added to read as follows:

#### § 51.319 Specific unbundling requirements.

\* \* \* \* \*

(h) *High frequency portion of the loop.*

(1) The high frequency portion of the loop network element is defined as the frequency range above the voiceband on a copper loop facility that is being used to carry analog circuit-switched voiceband transmissions.

(2) An incumbent LEC shall provide nondiscriminatory access in accordance with § 51.311 of these rules and section 251(c)(3) of the Act to the high frequency portion of a loop to any requesting telecommunications carrier for the provision of a telecommunications service conforming with § 51.230 of these rules.

(3) An incumbent LEC shall only provide a requesting carrier with access to the high frequency portion of the loop if the incumbent LEC is providing, and continues to provide, analog circuit-switched voiceband services on the particular loop for which the requesting carrier seeks access.

(4) *Control of the loop and splitter functionality.* In situations where a requesting carrier is obtaining access to the high frequency portion of the loop, the incumbent LEC may maintain control over the loop and splitter

equipment and functions, and shall provide to requesting carriers loop and splitter functionality that is compatible with any transmission technology that the requesting carrier seeks to deploy using the high frequency portion of the loop, as defined in this subsection, provided that such transmission technology is presumed to be deployable pursuant to § 51.230.

(5) *Loop conditioning.* (i) An incumbent LEC must condition loops to enable requesting carriers to access the high frequency portion of the loop spectrum, in accordance with §§ 51.319(a)(3), and 51.319(h)(1). If the incumbent LEC seeks compensation from the requesting carrier for line conditioning, the requesting carrier has the option of refusing, in whole, or in part, to have the line conditioned, and a requesting carrier's refusal of some or all aspects of line conditioning will not diminish its right of access to the high frequency portion of the loop.

(ii) Where conditioning the loop will significantly degrade, as defined in § 51.233, the voiceband services that the incumbent LEC is currently providing over that loop, the incumbent LEC must either:

(A) Locate another loop that has been or can be conditioned, migrate the incumbent LEC's voiceband service to that loop, and provide the requesting carrier with access to the high frequency portion of the alternative loop; or

(B) Make a showing to the relevant state commission that the original loop cannot be conditioned without significantly degrading voiceband services on that loop, as defined in § 51.233, and that there is no adjacent or alternative loop available that can be conditioned or to which the customer's voiceband service can be moved to enable line sharing.

(iii) If the relevant state commission concludes that a loop cannot be conditioned without significantly degrading the voiceband service, the incumbent LEC cannot then or subsequently condition that loop to provide advanced services to its own customers without first making available to any requesting carrier the high frequency portion of the newly-conditioned loop.

(6) *Digital loop carrier systems.* Incumbent LECs must provide to requesting carriers unbundled access to the high frequency portion of the loop at the remote terminal as well as the central office, pursuant to § 51.319(a)(2) and § 51.319(h)(1).

(7) *Maintenance, repair, and testing.* (i) Incumbent LECs must provide, on a nondiscriminatory basis, physical loop test access points to requesting carriers

at the splitter, through a cross-connection to the competitor's collocation space, or through a standardized interface, such as an intermediate distribution frame or a test access server, for the purposes of loop testing, maintenance, and repair activities.

(ii) An incumbent seeking to utilize an alternative physical access methodology may request approval to do so from the relevant state commission, but must show that the proposed alternative method is reasonable, nondiscriminatory, and will not disadvantage a requesting carrier's ability to perform loop or service testing maintenance or repair.

Federal Communications Commission.

**Magalie Roman Salas,**

*Secretary.*

## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 73

[DA 00-584; MM Docket No. 98-198; RM-9304, RM-9492, RM-9548, RM-9547]

### Radio Broadcasting Services; Texas and Oklahoma

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** In response to counterproposals in this proceeding filed by First Broadcasting Management, LLC, KCYT-FM License Corporation, Gain-Air, Inc., WBAP/KSCS Operating, Ltd., Blue Bonnet Radio, Inc., Heftel Broadcasting Corporation, Metro Broadcasters-Texas, Inc., Jerry Snyder and Associates, Inc., and Hunt Broadcasting, this document granted multiple channel substitutions and changes of community of license in Cross Plains, Allen, Benbrook, Brownwood, Burkburnett, Campbell, Clifton, Coleman, Commerce, Detroit, Graham, Granbury, Haskell, Kerens, Mason, Jacksboro, McKinney, Muenster, San Saba, Snyder, Terrell, Vernon, Waco, and Wichita Falls, TX; Alva, Anadarko, Antlers, Ardmore, Atoka, Comanche, Dickson, Duncan, Durant, Eldorado, Hugo, and Lone Grove, OK. See Supplementary Information. With this action, the proceeding is terminated.

**DATES:** Effective May 4, 2000.

**FOR FURTHER INFORMATION CONTACT:** Robert Hayne, Mass Media Bureau (202) 418-2177.

**SUPPLEMENTARY INFORMATION:** This is a synopsis of the *Report and Order* in MM Docket No. 98-198 adopted March 8, 2000, and released March 21, 2000. The full text of this decision is available for inspection and copying during normal business hours in the FCC Reference Center at Portals II, CY-A257, 445 12th Street, SW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, Inc., (202) 857-3805, 1231 20th Street, NW, Washington, DC 20036. Specifically, this document substitutes Channel 293A for Channel 294C at Muenster, Texas, and modifies the license of Station KXGM-FM to specify operation on Channel 294C. In order to accommodate Channel 294C at Muenster, it substitutes Channel 294C for Channel 296C1 at Granbury, Texas, reallots Channel 296C1 to Benbrook, Texas, and modifies the license of Station KDXT to specify operation on Channel 296C1 at Benbrook. It also substitutes Channel 294C2 for Channel 282C2 at Detroit, Texas, and substitutes Channel 284A for Channel 272A at Antlers, Oklahoma. It also substitutes Channel 295A for Channel 296A at McKinney, Texas, reallots Channel 296A to Campbell, Texas, and modifies the license of Station KZDF to specify operation on Channel 296A at Campbell. It substitutes Channel 294A for Channel 296C3 at Lone Grove, Oklahoma, and modifies the license of Station KYNZ to specify operation on Channel 263C3. To accommodate Channel 263C3 at Lone Grove, it substitutes Channel 296C3 for Channel 292A at Durant, Oklahoma, and modifies the license of Station KLBC to specify operation on Channel 292A. In order to accommodate Channel 296A at Campbell, it substitutes Channel 296A for Channel 295A at Terrell, Texas, reallots Channel 295A to Kerens, Texas, and modifies the license of Station KZDL to specify operation on Channel 295A at Kerens. The Channel 296C1 allotment at Benbrook requires the substitution of Channel 296C3 for Channel 234C3 at Graham, Texas, and modification of the license of Station KWKQ to specify operation on Channel 234C3; the substitution of Channel 296C3 for Channel 272C3 at Coleman, Texas, and the modification of the license of Station KSTA-FM to specify operation on Channel 272C3; and the substitution of Channel 296A for Channel 277A at Waco, Texas, and the modification of the license of Station KWBU to specify operation on Channel 277A. In order to allot Channel 277A at Waco, it substitutes Channel 277C3 for
