DEPARTMENT OF JUSTICE

Notice of Lodging of a Consent Decree Under the Comprehensive Environmental Response, Compensation and Liability Act

Under 42 U.S.C. § 9622(i), notice is hereby given that on January 22, 2002, a proposed Consent Decree in *United States v. Mountain Metal Co., et al.*, Civil Action No. CV-98-C-2562-S was lodged with the United States District Court for the Northern District of Alabama.

In this action, the United States sought reimbursement of costs incurred in responding to the release and threatened release of hazardous substances at the ILCO battery cracking site in Leeds, Alabama. In this Consent Decree, G. J. Batteries, Inc., and Jowers Battery, Inc., are settling their liability to the United States by paying a total of \$40,000 plus interest. This settlement is based on the defendants' showing of an inability to pay their allocable share. Prior to this Consent Decree, the United States obtained partial reimbursement of its costs through judicial settlement with 58 parties and administrative settlements with 286 parties.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of this publication. As a result of the discovery of anthrax contamination at the District of Columbia mail proceeding center in mid-October, 2001, the delivery of regular first-class mail sent through the U.S. Postal Service has been disrupted. BILLING CODE 4410-15-M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act, Clean Water Act, and Resource Conservation and Recovery Act

Notice is hereby given, in accordance with 28 CFR § 50.7, that on January 24, 2002, the United States lodged a proposed Consent Decree with the United States District Court for the Western District of Wisconsin, in *United States v. Murphy Oil USA, Inc.*, Case No. 00-C-409-C (W.D. Wis.), under the Clean Air Act, Clean Water Act, and Resource Conservation and Recovery Act. The proposed consent Decree resolves specific allegations and claims of the United States and the State of Wisconsin against Murphy Oil USA, Inc. ("Murphy Oil"), and specific violations found by the United States District Court for the Western District of Wisconsin, arising out of the company's operation of a petroleum refinery located at 2400 Stinson Avenue, Superior, Wisconsin. Under the settlement, Murphy will (1) Pay a civil penalty of \$5.5 million, \$750,000 of which the United States will share with

the State, (2) implement two Supplemental Environmental Projects ("SEPs") which will reduce sulfur dioxide ("SO₂") emissions from certain units at the Refinery that were outside the lawsuit, at a cost of \$7.5 million over five years, and (3) install a new pollution control device and perform other injunctive measures to remedy past violations and prevent future violations.

To address violations of the CAA's Prevention of Significant Deterioration ("PSD") requirements and New Source Performance Standards at the Refinery's Sulfur Recovery Unit ("SRU"), Murphy will install a tail gas treatment unit which will substantially reduce SO₂ emissions from the SRU and comply with stringent emission limitations that both EPA and the Wisconsin Department of Natural Resources ("WDNR") believe are very close to Best Available Control Technology ("BACT"). The Decree further requires Murphy to apply to WDNR for a PSD permit, which will include a formal determination of BACT, and provides that, if BACT includes a more stringent SO₂ emission limitation than that already in the Consent Decree, the Decree will be modified to incorporate the final BACT limitation. In addition, to address violations of the CAA's Leak Detection and Repair requirements, Murphy will implement for five years a Refinery-wide program the goal of which is to minimize volatile organic compound emissions from Refinery components. Finally, to address the CWA's Spill Prevention Control and Countermeasures requirements, Murphy will undertake measures to bring certain tanks into compliance, including measuring certain containment areas and increasing their capacity, if necessary.

To partially mitigate the penalty, Murphy will implement two SEPs: (1) A project to reduce Murphy's use of high sulfur fuel oil in process heaters and boilers to meet an SO₂ emission limitation of 33.3 tons per month, averaged over a rolling 12-month period; and (2) a project in which Murphy will use a SO_x transfer catalyst at its FCCU to reduce SO₂ emissions from the FCCU to no greater than 34.7 tons per month, averaged over a rolling 12-month period. These two SEPs will reduce SO₂ emissions from the Refinery by at least 580 tons per year beyond legal requirements.

The Department of Justice will accept written comments relating to the proposed Consent Decree for 30 days after publication of this Notice. Comments should be addressed to the Assistant Attorney General,
