

Coast Guard published a series of final rules implementing portions of the maritime security initiatives mandated by MTSA, including the vulnerability assessment and security plan requirements. The USCG final rules provide a list of tools that may be used to conduct vulnerability self-assessments. This list includes TMSARM, a no-cost, web-based, flexible vulnerability assessment tool designed by TSA specifically to meet the requirements of MTSA.

FOR FURTHER INFORMATION CONTACT: For additional information or questions, contact Nick Lakis, Office of Maritime and Land Security, Transportation Security Administration Headquarters, West Building, Floor 9, TSA-8, 601 South 12th Street, Arlington, VA 22202-4220; e-mail: nick.lakis@dhs.gov. For issues regarding the DHS/TSA's vulnerability self-assessment tool, contact Lynne Wolstenholme, Office of Threat Assessment and Risk Management, Transportation Security Administration Headquarters, West Tower, Floor 9, TSA-3, 601 South 12th Street, Arlington, VA 22202-4220; e-mail: tsarisk@dhs.gov.

SUPPLEMENTARY INFORMATION:

Background

On October 22, 2003, the USCG published in the **Federal Register** (68 FR 60447) a series of final rules, codified in the new Subchapter H of Title 33 of the Code of Federal Regulations (CFR), which adopted, with changes, the series of temporary interim rules published July 1, 2003 (68 FR 39240). This series of rules addresses security assessments and plans, as well as other security standards, measures, and provisions that are mandated by the Maritime Transportation Security Act (MTSA) of 2002 (Pub. L. 107-295, 116 Stat. 2064, Nov. 25, 2002). One of these MTSA requirements is that any facility or vessel that might be involved in a transportation security incident (TSI) conduct a vulnerability assessment and submit a security plan to the USCG by December 31, 2003. The MTSA defines a TSI as "a security incident that results in a significant loss of life, environmental damage, transportation system disruption, or economic disruption in a particular area."

TSA, in coordination with other Federal agencies, academia, and industry, developed a vulnerability self-assessment tool, the TSA Maritime Self-Assessment Risk Module (TMSARM), specifically to meet the security assessment requirements mandated by MTSA. This TSA tool is briefly discussed in the preamble of the USCG

final rules. The tool supports three basic functions: (1) Capturing a current snapshot of the user's security system baseline; (2) providing users with a vulnerability assessment tool; and (3) assisting users in their development of a comprehensive security plan. TMSARM is available to Company Security Officers (CSO), Vessel Security Officers (VSO), and Facility Security Officers (FSO). This outstanding service is specific to TMSARM and is available to TMSARM users at no cost. The tool is easily accessible on TSA's website at http://www.tsa.gov/public/interapp/editorial/editorial_0826.xml, and the user determines all ratings. Any information entered into the tool will not become accessible to the Federal government unless and until the party entering the data formally submits this information to the TSA.

Elements of the Self-Assessment Tool

Although the USCG provides examples of security assessment tools in 33 CFR 101.510, the list is not intended to be exhaustive. The USCG does not require owners or operators to conduct security assessments using a specific tool, provided that the assessments meet the requirements of its regulations. TMSARM is merely one means of satisfying the USCG requirements.

In general, TMSARM focuses on preventing and mitigating a base array of threat scenarios developed for the various categories of vessels and facilities that comprise the maritime transportation sector and are covered by the USCG rules. Users rate their vessel/facility in terms of target attractiveness and several consequence categories that broadly describe health and well-being, economic consequence, and symbolic value. Users will first list the vessel/facility's baseline security countermeasures that apply for each of the threat scenarios and then rate the effectiveness of the countermeasures in detecting and preventing terrorist's actions against each of the provided threat scenarios. The countermeasures are divided into broad countermeasure groupings that represent different security layers that may be implemented against the various threat scenarios. Descriptive guidance for the effectiveness rating is provided for each of the countermeasure categories. The performance-based effectiveness ratings range from very high to very low, and describe the vessel/facility's ability to thwart the threat.

TSA has also developed guidance documents for the security countermeasure categories. These documents guide users on how to populate the sections of their security

plans with the security information developed through use of both the TMSARM security checklist and the TMSARM vulnerability assessment tool. Additionally, the guidance documents identify specific security vulnerabilities from the USCG regulations and map them to the appropriate TMSARM security countermeasure effectiveness descriptions within the tool. Once vulnerabilities are identified, very specific guidance on how to fill out form USCG Form CG-6025 (Vulnerability and Security Measures Summary) is provided.

After the tool is applied across each of the provided threat scenarios to determine baseline countermeasures, users can re-apply the tool to assess the impact of adding new countermeasures or enhancing existing countermeasures. Additional or enhanced countermeasures are included in the security plan along with estimated resource requirements and a timeframe for implementation. Upon completion, users receive a report that summarizes their inputs. This report can be included in the security plan that is required to be submitted to the USCG. Users' input to the tool becomes part of a vulnerability assessment, which constitutes Sensitive Security Information (SSI) under TSA regulations at 49 CFR part 1520. SSI may be released only to persons with a need to know, except with the written permission of the TSA Administrator. Unauthorized release of SSI may result in civil penalties or other action.

Issued in Arlington, Virginia, on December 1, 2003.

James M. Loy,
Administrator.

BILLING CODE 4910-62-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-4809-N-49]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

FOR FURTHER INFORMATION CONTACT: Mark Johnston, room 7266, Department of Housing and Urban Development,

451 Seventh Street SW., Washington, DC 20410; telephone (202) 708-1234; TTY number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1-800-927-7588.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as for "off-site use only" recipients of the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Shirley Kramer, Division of Property Management, Program Support Center, HHS, room 5B-41, 5600 Fishers Lane, Rockville, MD 20857; (301) 443-2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For

complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll-free information line at 1-800-927-7588 for detailed instructions or write a letter to Mark Johnston at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: **AIR FORCE:** Mr. Albert F. Lowas, Jr., Air Force Real Property Agency, 1700 North Moore St., Suite 2300, Arlington, VA 22209-2802; (703) 696-5501; **COE:** Ms. Shirley Middleswarth, Army Corps of Engineers, Civil Division, Directorate of Real Estate, 441 G Street, NW., Washington, DC 20314-1000; (202) 761-7425; **ENERGY:** Mr. Tom Knox, Department of Energy, Office of Engineering & Construction Management, CR-80, Washington, DC 20585; (202) 586-8715; **GSA:** Mr. Brian K. Polly, Assistant Commissioner, General Services Administration, Office of Property Disposal, 18th and F Streets, NW., Washington, DC 20405; (202) 501-0052; **INTERIOR:** Ms. Linda Tribby, Acquisition & Property Management, Department of the Interior, 1849 C Street, NW., MS5512, Washington, DC 20240; (202) 219-0728; **NAVY:** Mr. Charles C. Cocks, Director, Department of the Navy, Real Estate Policy Division, Naval Facilities Engineering Command,

Washington Navy Yard, 1322 Patterson Ave., SE., Suite 1000, Washington, DC 20374-5065; (202) 685-9200; **VA:** Ms. Amelia E. McLellan, Director, Real Property Service (183C), Department of Veterans Affairs, 810 Vermont Avenue, NW., Room 419, Washington, DC 20420; (202) 565-5398; (These are not toll-free numbers).

Dated: November 25, 2003.

John D. Garrity,

Director, Office of Special Needs Assistance Programs.

Title V, Federal Surplus Property Program Federal Register Report for 12/5/2003

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of a Draft Revised Recovery Plan for the Chittenango Ovate Amber Snail for Review and Comment

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces availability for public review of a draft revised recovery plan for the Chittenango ovate amber snail (*Novisuccinea chittenangoensis*). This species is federally listed as threatened under the Endangered Species Act of 1973, as amended (Act) (16 U.S.C. 1531 *et seq.*). The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan received on or before January 5, 2004, will be considered by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy through the following means:

1. Through a written request to the Field Supervisor, U.S. Fish and Wildlife Service, New York Field Office, 3817 Luker Road, Cortland, New York 13045.
2. By telephone: 607–753–9334 or fax 607–753–9699.
3. By e-mail to Robyn_Niver@fws.gov.
4. By accessing the Field Office Web site: <http://nyfo.fws.gov>.

Copies of the draft recovery plan may also be viewed at two public libraries: Moon Library, State University of New York College of Environmental Science and Forestry, 1 Forestry Drive, Syracuse, New York 13210 (Telephone: 315–470–6726).

Sullivan Free Library, 519 McDonald Street (Back side of Genesee Street), Chittenango, New York 13037 (Telephone: 615–687–6331).

FOR FURTHER INFORMATION CONTACT: Ms. Robyn Niver, U.S. Fish and Wildlife Service, New York Field Office, 3817 Luker Road, Cortland, New York 13045.

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the federally listed species native to the United States. Recovery plans describe actions necessary for the conservation of the species, establish criteria which, when met, would result in a determination that the species no longer needs the protection of the Act, and provide estimates of the time and cost for implementing the needed recovery measures.

The Act requires recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and opportunity for public review and comment be provided during recovery plan development. The Service will consider all information received during a public comment period when preparing each new or revised recovery plan for approval. The Service and other Federal agencies will also take these comments into consideration in the course of implementing approved recovery plans.

The Chittenango ovate amber snail (*Novisuccinea chittenangoensis*) was listed as a threatened species in July

1978, and the initial recovery plan for the species was completed in March 1983. Since its discovery in 1905, only one extant *N. chittenangoensis* colony has been verified, from a site within the Chittenango Falls State Park in Madison County, New York. The Chittenango ovate amber snail was listed due to its rarity and population decline. Since listing, habitat protection and captive propagation measures have been implemented, but the species' status has become exceedingly precarious. The primary threats to the snail are its small population size and limited distribution as well as an undefined negative interaction with an introduced snail, *Succinea* sp. B. Additionally, potential threats persist from habitat changes and inadvertent human disturbance.

The Chittenango ovate amber snail is a terrestrial species that requires the cool, mild-temperature, moist conditions provided by the waterfalls and mist in its environment. Its habitat lies within a ravine at the base of a 167-foot waterfall, and the ledges where it is found comprise an early successional sere that is periodically rejuvenated to a bare substrate by floodwaters. The species requires a substrate rich in calcium carbonate and appears to prefer green vegetation such as the various mosses, liverworts, and other low herbaceous vegetation found within the spray zone adjacent to the falls. Clean water may be necessary to maintain essential habitat, although water quality may have only an indirect effect on the snail.

The recovery goal for the Chittenango ovate amber snail is to achieve long-term viability of the species in the wild, thereby allowing it to be taken off the Federal List of Endangered and Threatened Wildlife. The first phase of recovery for *N. chittenangoensis* will involve stabilizing the extant population at Chittenango Falls. To accomplish this, a habitat management/protection plan for Chittenango Falls is needed, along with research into the species' biological requirements and genetic status as well as possible means of controlling the competing *Succinea* sp. B and abating any additional threats to the snail and its habitat. Given the grave uncertainty about the in situ survival prospects of this snail, captive propagation is also viewed as essential for the species' stabilization.

Once the *N. chittenangoensis* population at Chittenango Falls is stabilized or increased, the second recovery phase for the species will involve establishing additional Chittenango ovate amber snail subpopulations at the Falls. In conjunction with long-term abatement
