Background and Purpose

A large number of recreational fishermen typically fish right off the entrance to the Station Port Huron Moorings. As such, it is typical for fishing line to cross the path of any station vessels exiting the harbor, especially in time-critical emergency situations. During the summer of 2003, on at least 4 occasions, vessels from Station Port Huron were removed from operations due to fishing line being wrapped around their shafts.

In these instances, Station Port Huron's boats were unavailable for search and rescue response during the most active portion of the year, the summer boating season. Having vessels out of service on a regular basis has resulted in a life-threatening situation. Station Port Huron has not been able to rely on having all of their underway assets available on a 24-hour basis, severely effecting time critical mission response.

In addition, due to security concerns it is necessary to prohibit vessels from anchoring or mooring within the RNA. On several occasions, vessels have been discovered inside Station Port Huron's
