Department of the Army

Privacy Act of 1974; System of Records

AGENCY: Department of the Army, DoD. **ACTION:** Notice to amend systems of records.

SUMMARY: The Department of the Army is proposing to amend three systems of records notices in its existing inventory of records systems subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended.

The first amendment consists of changing only the system identifier of 'A0001a US AHRC' to 'A0001a AHRC'. The notice was last published on November 18, 2003, at 68 FR 65045.

The second amendment corrects an administrative error published on January 6, 2004, at 69 FR 811. The system identifier for 'A0601–210 TAPC' was changed to 'A0601–210 AHRC'. However, the rest of the entry was incorrect. The correct notice is published below.

DATES: This proposed action will be effective without further notice on March 24, 2004, unless comments are received which result in a contrary determination.

ADDRESSES: Department of the Army, Freedom of Information/Privacy Act Office, U.S. Army Records Management and Declassification Agency, ATTN: AHRC-PDD-FP, 7798 Cissna Road, Suite 205, Springfield, VA 22153–3166.

FOR FURTHER INFORMATION CONTACT: Ms. Janice Thornton at (703) 806–7137/DSN 656–7137.

SUPPLEMENTARY INFORMATION: The first amendment consists of changing only the system identifier of 'A0001a US AHRC' to 'A0001a AHRC'. The notice was last published on November 18, 2003, at 68 FR 65045.

The second amendment corrects an administrative error published on January 6, 2004, at 69 FR 811. The system identifier for 'A0601–210 TAPC' was changed to 'A0601–210 AHRC'. However, the rest of the entry was incorrect. The correct notice is published below.

The Department of the Army systems of records notices subject to the Privacy Act of 1974, (5 U.S.C. 55a), as amended, have been published in the **Federal Register** and are available from the address above.

The specific changes to the records system being amended are set forth below followed by the notice, as amended, published in its entirety. The proposed amendments are not within the purview of subsection (r) of the Privacy Act of 1974, (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Intent To Prepare a Draft Programmatic Environmental Impact Statement for the Upper Mississippi River—Illinois Waterway System Navigation Study

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: A Draft Programmatic Environmental Impact Statement (DPEIS) will be prepared to address the restructured Upper Mississippi River-Illinois Waterway System Navigation Study. This is a modification of the notice of intent posted in the Federal Register on November 27, 1995 (60 FR 58339).

FOR FURTHER INFORMATION CONTACT:

Questions about the proposed action and Draft Environmental Impact Statement can be answered by Mr. Kenneth Barr by telephone (309) 794– 5349, or by mail: Commander, U.S. Army Engineer District, Rock Island (ATTN: CEMVR-PM-A), Clock Tower Building, P.O. Box 2004, Rock Island, IL 61204-2004.

SUPPLEMENTARY INFORMATION: The restructured Upper Mississippi River-Illinois Waterway System Navigation Study (Navigation Study, study) is being conducted under the authority of section 216 of the Flood Control Act of 1970. The 9-Foot Channel Navigation Project, originally authorized in 1930, is being reviewed for changed physical, economic, and environmental conditions that may warrant structural or non-structural modifications to reduce congestion of commercial navigation traffic and to enhance ecosystem restoration.

1. The initial reconnaissance studies concluded that there was sufficient evidence to suggest there was a Federal interest in conducting more detailed investigations relating to the issue of need and benefits of navigation improvements. Specific investigations

were recommended to define the base condition, analyze congestion problems, determine system benefits, and examine environmental impacts. The feasibility study was initiated in 1993 and narrowly focused on investigating a long-term solution to meet increased navigation demands and reduction of delays to commercial traffic caused by a congested system and associated environmental impacts. Study documentation for public review, other than supporting technical reports, was never completed.

2. The Chief of Engineers paused the study in 2001 and formed the Federal Principals Task Force to help define a new direction. The study was restarted in August 2001 under restructuring guidance formulated in consideration of comments received from the National Research Council (NRC) and from the Federal Principals Task Force. The pause allowed the Corps of Engineers to revise the project study plan to address the recommendations of the NRC review, as well as establish regionaland Washington-level interagency collaboration forums to help guide the future direction of the study. The restructured study will address the cumulative environmental effects of navigation and the needs for ecosystem restoration, providing a balanced consideration of fish and wildlife resources, along with navigation improvement planning. The feasibility study will ensure the waterway system continues to be a nationally treasured ecological resource as well as an efficient national transportation system by seeking ways to:

• Provide an efficient National Navigation System;

 Achieve an environmentally and economically sustainable system;

 Address ecosystem and floodplain management needs related to navigation;

• Operate and maintain the system to ensure economic, environmental, and social sustainability.

3. The feasibility study is evaluating both large- and small-scale measures that could be implemented to reduce commercial traffic delays and restore, protect, or preserve essential structures and functions of the natural ecosystem. Navigation improvement measures being evaluated include both structural and non-structural measures. Structural measures include extending the length of existing locks, constructing new locks and moorings (tie-off facilities that allow a waiting tow to wait closer to the lock chamber). Non-structural measures include scheduling and congestion fee systems for traffic management and switchboats (hired vessels permanently
