SUPPLEMENTARY INFORMATION:

History

On Thursday, December 30, 2004, the FAA proposed to revise part 71 of the Federal Aviation Regulations (14 CFR part 71) to create new Class E airspace upward from 700 ft. above the surface at Beluga, AK (69 FR 78371). The action was proposed in order to establish Class E airspace sufficient in size to contain aircraft while executing Special Instrument Approach Procedures at the Beluga Airport. New Class E controlled airspace extending upward from 700 ft. above the surface within a 5-mile radius of the Beluga Airport is established by this action. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No public comments have been received, thus, the rule is adopted as proposed.

The area will be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 of FAA Order 7400.9M, *Airspace Designations and Reporting Points*, dated August 30, 2004, and effective September 16, 2004, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This revision to 14 CFR part 71 establishes Class E airspace at Beluga Airport, Alaska. This additional Class E airspace was created to accommodate aircraft executing Special Instrument Flight Procedures and will be depicted on aeronautical charts for pilot reference. The intended effect of this rule is to provide adequate controlled airspace for IFR operations at Beluga Airport, Alaska.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally

current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority.

This rulemaking is promulgated under the authority described in Subtitle VII, part A, subpart 1, section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it creates Class E airspace sufficient in size to contain aircraft executing Instrument Approach Procedures for the Beluga Airport and represents the FAA’s continuing effort to safely and efficiently use the navigable airspace.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

■ In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9M, *Airspace Designations and Reporting Points*, dated August 30, 2004, and

effective September 16, 2004, is amended as follows:

* * * * *

Paragraph 6005 Class E airspace extending upward from 700 feet or more above the surface of the earth.

* * * * *

AAL AK E5 Beluga, AK [New]

Beluga, Airport, AK
(Lat. 61°10′20″ N., long. 151°02′38″ W.)

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Beluga Airport.

SUPPLEMENTARY INFORMATION:

History

On Tuesday, December 21, 2004, the FAA proposed to revise part 71 of the Federal Aviation Regulations (14 CFR part 71) to create new Class E airspace upward from 700 ft. above the surface at Angoon, AK (69 FR 76421). The action was proposed in order to establish Class E airspace sufficient in

size to contain aircraft while executing Special Instrument Approach Procedures at the Angoon Seaplane Base. New Class E controlled airspace extending upward from 700 ft. above the surface within a 7.5-mile radius of the Angoon Seaplane Base is established by this action. The longitude for the Angoon Seaplane Base was incorrectly listed in the Notice of Proposed Rulemaking and is corrected in the Final Rule. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No public comments have been received, thus, the rule is adopted as proposed.

The area will be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 of FAA Order 7400.9M, *Airspace Designations and Reporting Points*, dated August 30, 2004, and effective September 16, 2004, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This revision to 14 CFR part 71 establishes Class E airspace at Angoon Seaplane Base, Alaska. This additional Class E airspace was created to accommodate aircraft executing Instrument Flight Procedures and will be depicted on aeronautical charts for pilot reference. The intended effect of this rule is to provide adequate controlled airspace for IFR operations at Angoon Seaplane Base, Alaska.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code.

Subtitle 1, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart 1, Section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it creates Class E airspace sufficient in size to contain aircraft executing Instrument Approach Procedures for the Angoon Seaplane Base and represents the FAA’s continuing effort to safely and efficiently use the navigable airspace.

[Docket No. FAA–2004–19813; Airspace Docket No. 04–AAL–26]

Revision of Class E Airspace; Point Lay, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revises Class E airspace at Point Lay, AK to provide adequate controlled airspace to contain aircraft executing three new Standard Instrument Approach Procedures (SIAPs). This Rule results in new Class E airspace upward from 1,200 feet (ft.) above the surface at Point Lay, AK.

DATES: Effective 0901 UTC, May 12, 2005.

SUPPLEMENTARY INFORMATION:

History

On Friday, January 7, 2005, the FAA proposed to revise part 71 of the Federal Aviation Regulations (14 CFR part 71) to add to the Class E airspace upward from 1,200 ft. above the surface at Point Lay, AK (70 FR 1396). The action was proposed in order to add Class E airspace sufficient in size to contain aircraft while executing three new SIAPs for the Point Lay Airport. The new approaches are (1) Area Navigation—Global Positioning System (RNAV GPS) Runway 5, original; (2) RNAV (GPS) RWY 23, original; and (3) Non-directional Beacon (NDB) RWY 5, original. Additional Class E controlled airspace extending upward from 1,200 feet above the surface within a 46-mile radius of the Point Lay Airport area is established by this action. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the
