DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Toxicology Program (NTP); Center for the Evaluation of Risks to Human Reproduction (CERHR); Availability of the Expert Panel Reports on Amphetamines and Methylphenidate; Request for Public Comments

AGENCY: National Institute for Environmental Health Sciences

(NIEHS); National Institutes of Health (NIH).

ACTION: Announcement of report availability and request for comment.

SUMMARY: The CERHR announces the availability of the final expert panel reports on amphetamines and on methylphenidate on March 21, 2005, from the CERHR Web site (<http://cerhr.niehs.nih.gov>) or in printed text from the CERHR (see **FOR FURTHER INFORMATION CONTACT** below). The CERHR invites the submission of public comments on these expert panel reports (see **SUPPLEMENTARY INFORMATION** below). The expert panel reports are evaluations on the reproductive and developmental toxicities of amphetamines and methylphenidate conducted by a 13-member expert panel composed of scientists from the Federal government, universities, and private companies. The CERHR previously solicited public comment on draft versions of each expert panel report (**Federal Register** volume 69, number 208, pages 62906-62907). Public deliberations by the panel took place on January 10-12, 2005, at the Holiday Inn Old Town Select Alexandria, Virginia to review and revise the draft expert panel reports and reach conclusions regarding whether exposure to amphetamines or methylphenidate is a hazard to human development or reproduction. The expert panel also identified data gaps and research needs. The final revisions on these reports have been reviewed for accuracy of content and presentation by the amphetamines and methylphenidate expert panel, NTP scientists, and CERHR personnel.

DATES: The final expert panel reports on amphetamines and methylphenidate will be available for public comment on March 21, 2005. Written public comments on these reports must be received by May 5, 2005.

ADDRESSES: Comments on the expert panel reports should be sent to Dr. Michael D. Shelby, CERHR Director, NIEHS, P.O. Box 12233, MD EC-32, Research Triangle Park, NC 27709 (mail), (919) 316-4511 (fax), or shelby@niehs.nih.gov (e-mail). Courier address: CERHR, 79 T.W. Alexander Drive, Building 4401, Room 103, Research Triangle Park, NC 27709.

FOR FURTHER INFORMATION CONTACT: Dr. Michael D. Shelby, CERHR Director, 919-541-3455, shelby@niehs.nih.gov.

SUPPLEMENTARY INFORMATION:

Background

The National Toxicology Program (NTP) Center for the Evaluation of Risks to Human Reproduction (CERHR)

convened an expert panel on January 10-12, 2005. The purpose of this meeting was to evaluate the scientific evidence regarding the potential reproductive and/or developmental toxicities associated with exposure to the central nervous system stimulants, amphetamines and methylphenidate. Amphetamines evaluated were *d*- and *d,l*-amphetamine and methamphetamine. Amphetamine is indicated for the treatment of attention deficit hyperactivity disorder (ADHD) and narcolepsy and methamphetamine is indicated for the treatment of ADHD and for short-term treatment of obesity. Methylphenidate is a central nervous system stimulant approved by the Food and Drug Administration for the treatment of ADHD and narcolepsy in persons six years and older. The CERHR selected amphetamines and methylphenidate for expert panel evaluation because of widespread usage in children, availability of developmental studies in children and experimental animals, and public concern about the effect of these stimulants on child development.

Following receipt of public comments on the amphetamines and methylphenidate final expert panel reports, CERHR staff will prepare NTP-CERHR monographs for each of these compounds. NTP-CERHR monographs are divided into four major sections: (1) The NTP Brief which provides the NTP's interpretation of the potential for the chemical to cause adverse reproductive and/or developmental effects in exposed humans, (2) a roster of expert panel members, (3) the final expert panel report, and (4) any public comments received on that report. The NTP brief is based on the expert panel report, public comments on that report, and any new information that became available after the expert panel meeting.

Request for Comments

The CERHR invites written public comments on the amphetamines expert panel report and the methylphenidate expert panel report. The CERHR will post all comments received on the CERHR Web site and include them as an appendix in the NTP-CERHR monographs for these chemicals. All public comments will be considered by the NTP during preparation of the NTP Brief described above under "Background."

Written comments should be sent to Dr. Michael Shelby at the address provided above. Persons submitting written comments are asked to include their name and contact information (affiliation, mailing address, telephone
