SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated and require authorization under section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)).

On March 16, 2005, the Office of Fossil Energy (FE) of the Department of Energy (DOE) received an application from WPS ESI to transmit electric energy from the United States to Canada. WPS ESI is an indirect wholly-owned subsidiary of WPS Resources Corporation (WPSR), an exempt public utility holding company. WPS ESI has requested an electricity export authorization with a 5-year term. The electric energy which WPS ESI proposes to export to Canada would be purchased from electric utilities and Federal power marketing agencies within the U.S.

WPS ESI proposes to arrange for the delivery of electric energy to Canada over the existing international transmission facilities owned by Basin Electric Power Cooperative, Bonneville Power Administration, Eastern Maine Electric Cooperative, International Transmission Company, Joint Owners of the Highgate Project, Long Sault, Inc., Maine Electric Power Company, Maine Public Service Company, Minnesota Power Inc., Minnkota Power Cooperative, New York Power Authority, Niagara Mohawk Power Corporation, Northern States Power/Excel, Vermont Electric Power Company and Vermont Electric Transmission Company.

The construction, operation, maintenance, and connection of each of the international transmission facilities to be utilized by WPS ESI, as more fully described in the application, has previously been authorized by a Presidential permit issued pursuant to Executive Order 10485, as amended.
