Title: Region 7 Lead Education and Awareness Project in St. Louis, Missouri.

Abstract: EPA Region 7 and the Office of Compliance (OC) within the Office of Enforcement and Compliance Assurance (OECA) are planning to conduct a performance baseline survey and follow-up survey for the Lessors and Lessees sectors. OC is interested in having a baseline performance survey conducted and compliance assistance needs assessment for the Lessors sector. In addition, OC is interested in assessing the awareness and behavioral change of Lessees through a survey. There are three main purposes for these Lessor and Lessee surveys:

- To determine a baseline level of regulatory awareness of and compliance with the "Residential Lead-Based Paint

Hazard Reduction Act of 1992" (Title X) and the "Requirements for Disclosure of Known Lead-Based Paint and/or Lead-Based Paint Hazards in Housing" rule (Disclosure Rule), from which to measure the success of the Agency's compliance outreach efforts for reporting under the Government Performance and Results Act (GPRA). For key sectors for which EPA is planning to initiate compliance assistance, a baseline level of compliance and regulatory awareness is needed from which to measure future progress.

- To determine the effectiveness of the Department of Housing and Urban Development's (HUD) education and outreach efforts.
- To determine whether lessees are reading and understanding the Protect Your Family From Lead In Your Home pamphlet and whether they are implementing methods to reduce lead exposure as a result.

The EPA Region 7 is planning targeted Disclosure Rule inspections in high risk areas of St. Louis, Missouri during FY2005 and/or FY2006. The activities planned under the Statistically Valid Compliance Assistance Rate study are designed to determine the baseline rate of lessors' compliance with the Disclosure Rule and whether lessees are reading and understanding the Protect Your Family From Lead In Your Home pamphlet and implementing methods to reduce exposure to lead. The EPA would like to conduct statistically valid voluntary surveys with a sample size of approximately 150 respondents. These surveys will be used to establish a performance baseline at the start of the study. A follow-up survey will then be conducted to determine progress against the baseline.

The OECA has adopted a sector approach for many of its compliance assistance activities. The lessor sector is an example of a sector for which EPA has focused many of its compliance assistance activities. There is considerable debate as to the extent of regulatory compliance, the need for additional compliance assistance, and the effectiveness of compliance assistance methods and materials developed for this sector. The OECA would like to conduct a statistically valid voluntary survey and site-visit survey of a sample of lessor venues in areas of high risk for lead poisoning in St. Louis, Missouri to determine a performance snapshot of this sector which reflects current sector performance with respect to the Disclosure Rule. The surveys will be conducted as a voluntary blind sample (*i.e.*, the lessors' identities will be

unknown to EPA and the lessors will participate voluntarily). The results of the survey will provide OECA with information on compliance assistance applicable to this sector and information from which to measure the success of OECA's compliance assistance programs for Government Performance and Results Act (GPRA) reporting purposes.

The EPA Region 7 will evaluate the need for educational outreach for an additional sector: lessees in areas of St. Louis, Missouri at high risk for lead poisoning. Sufficient data are not available in EPA's databases to evaluate the current rate at which lessees are reading the EPA pamphlet, Protect Your Family From Lead In Your Home, and are implementing behavioral changes to reduce lead exposure as a result. Therefore, OECA is interested in determining:

- The level of regulatory awareness and compliance in the lessor sector;
- Areas of noncompliance and root causes of noncompliance;
- The need for compliance assistance for the lessor sector
- The need for educational outreach for the lessee sector.

The OECA is soliciting comment on whether to conduct a statistically valid voluntary survey and site-visit survey of a sample of lessors and a site-visit survey of a sample of lessees in high risk areas of St. Louis.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 1.5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Lessors conducting business in areas of high risk for lead poisoning in St. Louis, Missouri; Lessees living in areas of high risk for lead poisoning in St. Louis, Missouri.

Estimated Number of Respondents: Approximately 150 respondents in areas of high risk for lead poisoning in St. Louis Missouri.

Frequency of Response: Twice (EPA Region 7 will conduct a follow-up survey in FY2007).

Estimated Total Annual Hour Burden: 225 hours.

Estimated Total Annual Cost: \$11,000, which includes \$0 annual capital/startup and O&M costs, and \$11,000 annual labor costs.

Dated: January 10, 2005.

Oscar Morales,

Director, Collection Strategies Division.
