SUPPLEMENTARY INFORMATION: The proposed action is to add to APAFR's capabilities to allow it to conduct all components of "air-to-ground ordnance delivery and training" of integrated and sustainment levels of the FRTP at the range, a critical element of which is delivery of HE ordnance. Training would originate from afloat Navy Carrier Strike Groups operating in either the Atlantic Ocean or the Gulf of Mexico. FRTP training exercises are typically conducted three times a year, but depending on world conditions and military requirements, up to six exercises could occur annually. Although unlikely, there is a remote possibility that APAFR could be utilized as the sole range for the delivery of HE munitions for the FRTP over the course of a given year. This would be the exception rather than the rule. Each exercise would use the range for 20 days, resulting in Navy specific use of the range for as many as 60 days during a typical year, up to a maximum of 120 days. The purpose of the proposed action is to improve and enhance the Atlantic Fleet's depth of range resources for FRTP, and, consequently, increase its flexibility to conduct training. The Atlantic Fleet needs to fulfill its

statutory mission to have combat-capable air forces ready to deploy worldwide. The Navy is the lead agency for the proposed action with the U.S. Department of the Air Force (Air Force) serving as cooperating agency.

In the Draft EIS, the Navy initially identifies nine candidate ranges for conducting all components of air-to-ground training exercises associated with the FRTP. Two of these ranges (Eglin Air Force Base and the Navy's Pinecastle Range, both in Florida) do not meet the purpose of the proposed action to enhance the depth of available resources. These ranges currently support all components of air-to-ground ordnance delivery, including use of explosive ordnance, and training. Six of the remaining seven (Rodman Bombing Range, Florida; Lake George Bombing Range, Florida; Townsend Bombing Range, Georgia; Dare County Bombing Range, North Carolina; Cherry Point Range Complex, North Carolina; and Camp Shelby Range Complex, Mississippi) candidates fail to fully meet the aircrew training enhancement objectives used to screen the ranges.

Six air-to-ground training alternatives within APAFR are analyzed in detail in the Draft EIS. The alternatives involve using different combinations of target ranges at APAFR. The preferred alternative would use a range identified as the Alpha Plus range for air-to-ground training. This alternative minimizes impacts to endangered species and their habitat on APAFR, as well as other operations and activities on the range.

The Draft EIS has been distributed to various Federal, state, and local agencies, as well as other interested individuals and organizations. In addition, copies of the Draft EIS have been distributed to the following libraries for public review:

however, to ensure the accuracy of the record, all statements should be submitted in writing. All statements, both oral and written, will become part of the public record on the Draft EIS and will be responded to in the Final FEIS. Equal weight will be given to both oral and written statements.

In the interest of available time, and to ensure all who wish to give an oral statement have the opportunity to do so, each speaker's comments will be limited to three (3) minutes. If a longer statement is to be presented, it should be summarized at the public hearing and the full text submitted in writing either at the hearing or mailed or faxed to: Commander, Southern Division Naval Facilities Engineering Command, Attn: Mr. Will Sloger (Code ES12), P.O. Box 190010, North Charleston, SC 29419-9010, telephone (843) 820-5797, facsimile (843) 820-7472.
