GOVERNMENT ACCOUNTABILITY OFFICE

Advisory Council on Government Auditing Standards; Notice of Meeting

The Advisory Council on Government Auditing Standards will meet Thursday, April 6, 2006, from 8:30 a.m. to 4:30 p.m., in room 7C13 of the Government

Accountability Office building, 441 G Street, NW., Washington, DC.

The Advisory Council on Government Auditing Standards will hold a meeting to discuss issues that may impact government auditing standards. The meeting is open to the public. Council discussions and reviews are open to the public. Members of the public will be provided an opportunity to address the Council with a brief (five minutes) presentation on Thursday afternoon.

Any interested person who plans to attend the meeting as an observer must contact Jennifer Allison, Council Assistant, 202-512-3423. A form of picture identification must be presented to the GAO Security Desk on the day of the meeting to obtain access to the GAO building. For further information, please contact Ms. Allison. Please check the Government Auditing Standards Web page (<http://www.gao.gov/govaud/ybk01.htm>) one week prior to the meeting for a final agenda.

[Public Law 67-13, 42 Stat. 20 (June 10, 1921)]

Dated: March 2, 2006.

Marcia B. Buchanan,
Assistant Director.

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C.

Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 395-6974. Written comments should be received within 30 days of this notice.

Proposed Project

A Comprehensive Evaluation of an Approach to Self-Management: "Diabetes: Living My Best Life"—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

African-American women are twice as likely as white women to be diagnosed with diabetes, and two and one-half times as likely to die from diabetic complications. The onset of type 2 diabetes in African-American adults is attributable not only to a genetic link, but also to unhealthy lifestyle practices. The vast number of African-American women with type 2 diabetes report having a sedentary lifestyle and eating a diet high in fat. In addition to taking

medications, lifestyle modifications, such as changes in diet, weight loss and participating in a low-impact exercise program, can significantly reduce the complications experienced by women with type 2 diabetes. Unfortunately, there is a scarcity of training and educational materials on type 2 diabetes targeting the African-American woman. The limited availability of targeted educational materials has undoubtedly contributed to an inability to manage and control this disease in this population and has resulted in a higher prevalence of disease-related comorbidities. There is a need for innovative interventions that can be used in a variety of settings, and that feature culturally appropriate assets that will engage African-American women with type 2 diabetes in a proactive role in the treatment and management of their disease.

The proposed project is the evaluation of a CD-ROM educational program: "Diabetes: Living My Best Life." This product has been developed to teach African American women with type 2 diabetes self-management skills. Social Learning Theory (SLT) informed the development of the product and the

selection of the media elements. Selection of the information and tools was guided by input from an Advisory Board composed of professionals in the field and African American women with type 2 diabetes.

To evaluate this program there will be two questionnaires: A Pretest and a Posttest. The two questionnaires will include questions on:

- Respondent demographic information (Pretest only).
- Respondent use of computers (Pretest only).
- Knowledge of diabetes.
- Self-efficacy in addressing diabetes self-management issues.
- Diabetes self-care activities.
- Feeling of empowerment around diabetes self-management.
- Social learning theory elements (Posttest only).

Pretest and Posttest intervention data will be collected by computer. Burden estimates are based observation of African-American women with type 2 diabetes who completed a formal pilot test of the Pretest and Posttest forms. There are no costs to respondents except their time to participate in the survey. The annualized burden hours are 44.

ANNUALIZED BURDEN TABLE

Respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
African American women with Type 2 diabetes—Pretest	66	1	20/60
African American women with Type 2 diabetes—Posttest	66	1	20/60

Dated: February 28, 2006.

Joan F. Karr,

Acting Reports Clearance Officer, Centers for Disease Control and Prevention.

Proposed Project

The National Birth Defects Prevention Study (OMB 0920-0010)—Extension—National Center on Birth Defects and Developmental Disabilities (NCBDDD), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The National Birth Defects Prevention Study has been monitoring the occurrence of serious birth defects and genetic diseases in Atlanta since 1967 through the Metropolitan Atlanta Congenital Defects Program (MACDP). The MACDP is a population-based surveillance system for birth defects in the 5 counties of Metropolitan Atlanta.

Its primary purpose is to describe the spatial and temporal patterns of birth defects occurrence and serve as an early warning system for new teratogens. From 1993 to 1996, DBDDD conducted the Birth Defects Risk Factor Surveillance (BDRFS) study, a case-control study of risk factors for selected birth defects. Infants with birth defects were identified through MACDP and maternal interviews, and clinical/laboratory tests were conducted on approximately 300 cases and 100 controls per year. Controls were selected from among normal births in the same population. In 1997 the BDRFS became the National Birth Defects Prevention Study (NBDPS). The major components of the study did not change.

The NBDPS is a case-control study of major birth defects that includes cases identified from existing birth defect surveillance registries in ten states (including metropolitan Atlanta). Control infants are randomly selected from birth certificates or birth hospital
