Title: NSPS for Commercial and Industrial Solid Waste Incineration Units (Renewal).

ICR Numbers: EPA ICR Number 1926.04, OMB Control Number 2060-0450.

ICR Status: This is a request to renew an existing approved collection that is scheduled to expire on March 31, 2007. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by

publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Environmental Protection Agency (EPA) is required under section 111 of the Clean Air Act, as amended, to collect data. The information will be used by Agency enforcement personnel to (1) identify existing sources subject to these standards; (2) ensure that Best Demonstrated Technology is being properly applied; and (3) ensure that the emission control device is being properly operated and maintained on a continuous basis. In addition, records and reports are necessary to enable the EPA to identify those site remediation facilities that may not be in compliance with these standards. Based on reported information, the EPA can decide which facilities should be inspected and what records or processes should be inspected at the facilities. The records that site remediation facilities maintain would indicate to the EPA whether the personnel are operating and maintaining control equipment properly. The type of data required is principally emissions data (through parametric monitoring) and would not be confidential. If any information is submitted to the EPA for which a claim of confidentiality is made, the information would be safeguarded according to the Agency policies set forth in 40 CFR, chapter 1, part 2, subpart B.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on June 21, 2006. No comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 250 hours per response. Burdens means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the

existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Commercial and Industrial Solid Waste Incineration Units.

Estimated Number of Respondents: 31.

Frequency of Response: Initial, on occasion, semiannual, annual.

Estimated Total Annual Hour Burden: 11,246.

Estimated Total Annual Cost: \$1,029,920 which includes \$2,240 Annualized Capital Start up Costs, \$6,330 Annualized Operations & Maintenance (O&M), and \$1,021,350 Annualized Labor Costs.

Changes in the Estimates: There is a decrease in cost from the most recently approved ICR due to the revised number of sources. There is also an overall reduction in burden because the estimated growth rate for the industry was reduced from six to one per year. For the same reason, the capital startup costs are lower.

Dated: March 8, 2007.

Oscar Morales,

Director, Collection Strategies Division.

Abstract: EPA's Significant New Alternatives Policy (SNAP) program implements section 612 of the 1990 Clean Air Act Amendments which authorized the Agency to establish regulatory requirements to insure that ozone depleting substances would be replaced by alternatives that reduce overall risks to human health and the environment, and to promote an expedited transition to safe substitutes. To promote this transition, the Act specified that EPA establish an information clearinghouse of available alternatives, and coordinate with other Federal agencies and the public on research, procurement practices, and information and technology transfers.

Since the program's inception in 1994, SNAP has reviewed over 400 new chemicals and alternative manufacturing processes for a wide range of consumer, industrial, space exploration, and national security applications. Roughly 90% of alternatives submitted to EPA for review have been listed as acceptable for a specific use, typically with some condition, or limit to minimize risks to human health and the environment.

Regulation promulgated under SNAP requires that mobile air conditioners (MAC) retrofitted to use a SNAP substitute refrigerant include basic information on a label to be affixed to the air conditioner. The label includes the name of the substitute refrigerant, when and by whom the retrofit was performed, environmental and safety
