

SUPPLEMENTARY INFORMATION: On August 21, 2007, CBP published a general notice in the **Federal Register** (72 FR 46654) announcing a modification of the PEA test. The PEA test procedure allows test participants (importers) to amend entry summaries (not informal entries) prior to liquidation by filing with CBP either a single PEA upon discovery of certain kinds of errors or a quarterly tracking report covering certain other errors that occurred during the quarter. The test modification, which became effective on September 20, 2007, concerned the timeliness of filing single PEAs. Prior to the modification, the test participant was required to file a single PEA promptly after discovery of a covered error and prior to the liquidation of the subject entry summary. The test procedure as modified requires that a single PEA be filed at least 20 days before the scheduled liquidation date of the subject entry summary.

The modification notice explained that an untimely filed single PEA would be rejected and a timely filed single PEA would be treated by CBP as a protest under 19 U.S.C. 1514 in any instance where the entry summaries are not unset or processed by the scheduled liquidation date and liquidation therefore occurs without benefit of the requested amendment.

Correction

Under 19 U.S.C. 1514, a protest must be filed within a certain period after, not before, certain specified CBP actions, one of which is liquidation of the entry summary. To treat a single PEA filed prior to the liquidation, as described above, as a protest of the liquidation is contrary to the terms of the statute. Therefore, this notice specifies that in the instance of such liquidation, performed without consideration of the PEA, CBP may reliquidate the entry summary voluntarily under 19 U.S.C. 1501 or the importer may file a protest under 19 U.S.C. 1514.

Assistant Commissioner, Office of International Trade.

DEPARTMENT OF THE INTERIOR

UTAH RECLAMATION MITIGATION AND CONSERVATION COMMISSION

Central Utah Project Completion Act

AGENCIES: Department of the Interior. Office of the Assistant Secretary—Water and Science (Interior); and the Utah Reclamation Mitigation and Conservation Commission (Mitigation Commission).

ACTION: Notice of Availability, Final Environmental Impact Statement (FEIS), Lower Duchesne River Wetlands Mitigation Project (LDWP), Duchesne and Uintah Counties, Utah.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 (NEPA), as amended, Interior and the Mitigation Commission (Joint Lead Agencies), have issued a Final Environmental Impact Statement (FEIS) for the Lower Duchesne River Wetlands Mitigation Project in Duchesne and Uintah Counties, Utah. The FEIS addresses potential impacts related to construction and operation of features proposed for the project and incorporates responses to public comments received on the Draft EIS.

The FEIS is intended to satisfy disclosure requirements of NEPA and will serve as the NEPA compliance document for contracts, agreements and permits that would be required for construction and operation of the project.

SUPPLEMENTARY INFORMATION:

Background—The LDWP is proposed to fulfill certain environmental mitigation commitments of the Bonneville Unit of the Central Utah Project. The Strawberry Aqueduct and Collection System (SACS) is a key component of the Bonneville Unit, collecting water from the Upper Duchesne River and its tributaries and storing it in Strawberry Reservoir for delivery westward to the Wasatch Front in Utah. As a result, wetlands and wildlife habitats along the Duchesne River have been adversely impacted. Substantial wetland impacts occurred on the Uintah and Ouray Reservation lands of the Ute Indian Tribe. The Proposed Action would create, restore, and otherwise enhance riparian wetland habitats on reservation

lands of the Ute Indian Tribe along the Duchesne River in Utah as partial mitigation for these Bonneville Unit impacts. The LDWP has been planned in conjunction with the Ute Indian Tribe and is intended to fulfill a long-standing commitment to mitigate for impacts to Ute Indian tribal wetland-wildlife resources and to provide additional wetland/wildlife benefits to the Ute Indian Tribe.

Notice of Intent to initiate public scoping and prepare a Draft EIS was published in the **Federal Register** on April 25, 2001 (66 FR 20827). Scoping was accomplished by means of three public meetings convened in Ft. Duchesne, Roosevelt and Salt Lake City, Utah in May 2003. The DEIS was filed with the EPA by the Joint Lead Agencies on November 17, 2003. Notice of Availability of the DEIS was announced in the **Federal Register** on November 24, 2003 (68 FR 65943). Three public meetings were held in Ft. Duchesne, Roosevelt and Salt Lake City, Utah in December 2003, to receive public comment on the DEIS. Comments received during the public comment period from November 17, 2003 to February 17, 2004, were considered during preparation of the FEIS.

Publication of a Record of Decision for the LDWP will occur no sooner than 30 days from the date of this notice.

Proposed Action—Approximately 4,807 acres of land composed of 3,215 acres of Ute Indian Tribal trust lands, and 1,592 acres of fee lands to be acquired by the Federal Government, would be acquired and/or developed into cohesive wetlands management units. A portion of the water currently managed by the Bureau of Indian Affairs for the Ute Indian Tribe under the existing Uinta Indian Irrigation Project would be utilized, along with water that may be acquired with fee land acquisitions, to create, restore and enhance wetlands throughout the project area. Lands acquired in fee title

(except lands acquired by eminent domain) would be transferred to the Ute Indian Tribe. All project lands (dedicated tribal and acquired lands) would be managed for project purposes by the Ute Indian Tribe under management agreements with the Joint Lead Agencies to achieve the prescribed wetlands-associated fish and wildlife benefits, and for other wetland/wildlife-related tribal benefits.

Alternatives—Two action alternatives were developed and evaluated. The alternatives included in the FEIS are similar to the Proposed Action, differing only in the acreage amounts and locations.

No Action—No lands or waters would be acquired or managed for wetland habitat improvements or tribal benefits. This Central Utah Project, Bonneville Unit mitigation commitment to the Ute Indian Tribe would remain unfulfilled. The Commission would undertake additional planning to develop an acceptable alternative means to complete this mitigation commitment.

Reed R. Murray,

Program Director, Department of the Interior.

Michael C. Weland,

Executive Director, Utah Reclamation Mitigation and Conservation Commission.
