From 2009 to 2011, DAWN will continue to recruit hospitals in the 13 oversampled metropolitan areas and in the remainder of the U.S. in order to improve the precision of estimates, adding approximately 43 sampled hospitals that are currently not participating. In 2009 and 2010, DAWN plans to recruit 2 States with centralized ME/C systems. To achieve full participation by ME/Cs in the metropolitan areas currently covered,

DAWN plans to recruit approximately 20 more ME/Cs from the 13 metropolitan areas, and approximately 20 ME/Cs from metropolitan areas in the rest of the country. DAWN data are submitted electronically, using eHERS (electronic Hospital Emergency Reporting System) and eMERS (electronic Medical Examiner Reporting System). In most of the facilities participating in DAWN (83 percent of the EDs and 58 percent of the ME/C offices), data are collected by government contractor staff; these

facilities are not included in the burden statement because the facility staff are not involved in data collection. The annual burden estimates for those EDs and ME/C offices that collect the data using their own staff are shown below. There will be minor editorial changes to both the ED and ME/C reporting forms to simplify reporting. On the ME/C reporting form, a data element for case narrative will be added. These changes are not anticipated to impact the overall burden.

¹ Data collection for the 61 EDs and 101 ME/Cs where data are collected by facility staff or other staff (does not include data collected by DAWN operations contractor staff).

² In participating States, a single office reports for all jurisdictions; in other areas, a single medical examiner/coroner office may report for multiple jurisdictions. For this reason, the number of respondents is smaller than the number of ME/C jurisdictions participating in DAWN.
