

The notices will specifically seek input on the process for reviewing post-exercise assessments and include an offer to meet jointly with Navy representatives from the office of the Assistant Secretary of the Navy (Installations & Environment) and the office of the Chief of Naval Operations, and CEQ to discuss the alternative arrangements.

CEQ will be provided copies of any notices made in accordance with the alternative arrangements and the notices will be posted on the Web site at <http://www.socalrangecomplexeis.com>.

The Navy will also provide CEQ notice of the post-exercise assessments which the Navy prepares for each exercise within 120 days of completion of each exercise (or 120 days after completion of an exercise which is reported as part of a group of exercises) to which these alternative arrangements apply. Further dissemination of the post-exercise assessments will be determined after considering input received in response to the Navy notice of alternative arrangements, and the further dissemination of the post-exercise assessments will be incorporated into the alternative arrangements.

After the conclusion of the alternative arrangements, and no later than March 23, 2009, the Navy will provide a report to CEQ on the use of the alternative arrangements that reviews the value and effectiveness of those arrangements. Notice of the report will be provided in the **Federal Register**, the five newspapers (Los Angeles Times; Sacramento Bee; San Diego Union-Tribune; North County Times (San Diego County); and Daily Breeze (San Pedro, California)) and on the Web site at <http://www.socalrangecomplexeis.com>.

Adaptive Management: Under the NDE, the Navy will continue to submit to NMFS's Office of Protected Resources (OPR) a report, within 120 days of the completion of major exercises, containing a discussion of the nature of effects on marine mammals from exposure to MFA sonar, if observed, based upon both modeled results of real-time events and sightings of marine mammals.

The Navy also consulted under the ESA with NMFS regarding the effects of its sonar activities for these exercises on listed species. NMFS issued a Biological Opinion finding that the Navy's actions were not likely to result in jeopardy to any listed species nor adversely modify any designated critical habitat. The Navy will continue to adhere to monitoring and reporting requirements specified in the Biological Opinion.

The Navy will continue to meet the requirements set out in the NDE for AARs. To accelerate and improve the information on marine mammal exposure effects or lack of effects, the Navy will modify its reporting and recordation processes to enable a more comprehensive analysis of impacts to marine mammals (including beaked whales that are not listed under the ESA) and ASW training during these major exercises and integrate these modifications into the reports prepared on the exercises conducted between March 1, 2008, and January 23, 2009. The reporting and monitoring program improvements identified using adaptive management principles will also inform the EIS process for the SOCAL Range Complex.

Research Measures: Efforts to obtain more information about the quantity, distribution, migration, and reactions of marine mammals to MFA sonar is ongoing and will continue. Consequently, information being obtained will inform compliance with the substantive provisions of the MMPA and ESA, and the procedural requirements of CZMA and NEPA. For NEPA, this information will inform the ongoing SOCAL EIS process as well as future exercise planning in the SOCAL Operating Area and serve to provide the basis for integrated compliance with all environmental statutes.

The Navy will continue to implement the following research measures to provide for continual improvement in the quality of information available:

The Navy will continue to improve information regarding marine mammal presence and density in the SOCAL Operating Area by coordinating with NMFS to determine the need to identify areas within the SOCAL Operating Area for additional marine mammal surveys. If a need is identified, an implementation plan identifying the areas and providing a schedule for the surveys will be developed no later than July 2008. The surveys will be designed to help determine where and when there are concentrations of marine mammals in the SOCAL Operating Area. The survey will occur over a two-year period through July 2010.

The Navy will continue to work on a program that will enhance its ability to use passive hydrophones on the SOAR Instrumented Range to detect and track marine mammals on those portions of the range where the passive hydrophones are in place. To ensure that these efforts remain focused, the Navy will develop an implementation plan and schedule to expand the technical capability of existing hydrophones to detect marine mammals

by April 4, 2008. The implementation plan should provide for completion of prototype classifiers for Cuvier's and Blaineville's beaked whales and visual verification of other small odontocetes detected by passive hydrophones by April 15, 2009.

As part of the SOCAL EIS, the Navy is evaluating a proposal to extend the range areas monitored by passive hydrophones. If Navy decides to extend the area covered by passive hydrophones as part of its ROD for the SOCAL EIS, the Navy will determine a timetable for acquisition and installation of additional hydrophones by March 30, 2009.

The Navy is evaluating current research regarding infrared (IR) technology for use in collecting data regarding marine mammals, assessing the feasibility of acquiring and deploying additional IR capabilities during major exercises or for conducting surveys, and developing a plan for acquiring and deploying IR in data collection efforts. The plan will be published no later than June 15, 2008.

Dated: January 15, 2008.

Donald C. Winter,

Secretary of the Navy.
