

Example 2: S/N yyy was originally a Group 3 airplane; later it was modified with a PT6A-34, 750 horsepower, turbine engine when the wing front lower spar caps had 5,300 hours TIS on them. The wing front lower spar caps now have 7,700 hours TIS.

Usage Factor = $5,300 \text{ hours} / 28,800 + (7,700 - 5,300) / 6,200 = 0.571$ Equivalent Group 1 hours = $6,200 \times 0.571 = 3,540$ hours.

The spar caps will need to be replaced at 6,200 Equivalent Group 1 total hours TIS, which is within the next 2,660 hours TIS ($6,200 - 3,540 = 2,660$).

History

In November 2008, Salt Lake City Terminal Area Approach Control Facility (TRACON) requested the establishment of a new airway to facilitate the handling of aircraft entering the Salt Lake City terminal area. This action responds to that request.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 to establish VOR Federal Airway 626 (V-626) from the Myton, UT, VORTAC to the Salt Lake City terminal Area. This new route will provide a more precise means of navigation and reduce controller workload.

Domestic VOR Federal Airways are published in paragraph 6010(a) of FAA Order 7400.9S, signed October 3, 2008, and effective October 31, 2008, which is incorporated by reference in 14 CFR 71.1. The domestic VOR Federal Airway listed in this document will be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes a VOR Federal Airway in Utah.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures," prior to any FAA final regulatory action.
