

Justification for the Exception to Competition: HRSA is ending the two cohort system for the following reason:

The Combating Autism Act of 2006 is scheduled to sunset in September of 2011. With this legislation, it is critical to have sufficient and accurate data to evaluate the progress of screening and diagnosing a greater number of children with autism spectrum disorder (ASD) and other developmental disabilities and assuring that they receive evidenced based services. A national evaluation will be conducted to contribute to the HHS Secretary's Report to Congress on progress related to ASD and other developmental disabilities as required by the Combating Autism Act. From a programmatic perspective, it is imperative to collect data from the same group of grantees over the project period to assess program goals as requested in the National Evaluation. By extending the project period for two additional years for the LEND cohort with the current project period ending date of June 30, 2009, MCHB will be able to collect common data elements from both LEND cohorts through the end of Combating Autism Act which sunsets in 2011. Doing so will help ensure that there will be a more cohesive and uniform collection of data being gathered and analyzed across both cohorts which will increase sample size and ultimately, data validity and study power. If it becomes necessary to hold a competition for the LEND cohort in FY 2009 and new applicants were to apply and be successful, there would be the potential for less uniformity in the data collection. It is crucial that there is as much meaningful data gathered in the remaining time available from both cohorts to ensure that the National Evaluation is an accurate reflection of the program activities.

Under this deviation, MCHB will provide the LEND grantees in LEND Cohort A, currently expected to compete in FY 2009, with the same amount of funds for the same scope of activities that they received in FY 2008 for both the FY2009 and 2010 budget periods.

Dated: January 13, 2009.
