

Based on provenience and radiocarbon dates, the human remains are reasonably believed to be culturally affiliated to the Klamath.

In 1967, human remains representing a minimum of 93 individuals were removed from the Nightfire Island site (4SK4), west of Lower Klamath Lake, Siskiyou County, CA, by University of Oregon staff. No known individuals were identified. The 885 associated funerary objects are 755 shell beads, 2 quartz crystals, 35 agates and pebbles, 4 pipes, 4 fragments of basketry or matting, 4 pieces of worked bone, 38 projectile points and fragments thereof, 1 biface fragment, 29 worked and unworked flakes, 7 cores, 2 mortar fragments, 2 pestle fragments, 1 whetstone, and 1 novaculite slab. Additional funerary objects were excavated, but were stolen before they could be accessioned into museum collections.

The human remains are determined to be Native American based on archeological context and the character of the associated funerary objects. The associated funerary objects date the burials to within the 2,500 years prior to Euro-American contact. The human remains are reasonably believed to be culturally affiliated to the Klamath or Modoc.

In 1978, human remains representing one individual were removed from archeological site 35KL95, along Highway 140, east of the town of Beatty, Klamath County, OR, during excavations by University of Oregon staff. No known individual was identified. No associated funerary objects are present.

Based on archeological context, the human remains are determined to be Native American. The human remains are reasonably believed to be culturally affiliated to the Klamath, Modoc, or Yahooskin.

Historical documents, ethnographic sources, and oral history indicate that the Klamath, Modoc, and Yahooskin have occupied south-central Oregon and northeastern California since precontact times. Archeological context and/or skeletal evidence indicates that the above mentioned human remains are Native American, and of possible Klamath, Modoc, or Yahooskin cultural affiliation. Descendants of the Klamath, Modoc, and Yahooskin are members of the Klamath Tribes, Oregon and Modoc Tribe of Oklahoma. The Klamath Tribes, Oregon have taken the lead on repatriation of Native American human remains from the areas described above that are culturally affiliated with the Klamath, Modoc, and Yahooskin.

Officials of the Oregon State Museum of Anthropology have determined that, pursuant to 25 U.S.C. 3001 (9–10), the human remains described above represent the physical remains of 143 individuals of Native American ancestry. Officials of the Oregon State Museum of Anthropology have also determined that, pursuant to 25 U.S.C. 3001 (3)(A), the 1,366 objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Lastly, officials of the Oregon State Museum of Anthropology have determined that, pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Klamath Tribes, Oregon and Modoc Tribe of Oklahoma.

Representatives of any other Indian tribe that believes itself to be culturally affiliated with the human remains and associated funerary objects should contact Dr. Pamela Endzweig, Director of Collections, Oregon State Museum of Anthropology, 1224 University of Oregon, Eugene, OR 97403–1224, telephone (541) 346–5120, before March 4, 2009. Repatriation of the human remains and associated funerary objects to the Klamath Tribes, Oregon may proceed after that date if no additional claimants come forward.

Oregon State Museum is responsible for notifying Klamath Tribes, Oregon and Modoc Tribe of Oklahoma that this notice has been published.

Dated: January 5, 2009
