Northern Lights 2009–2010 Zone EF Expansion Project; Notice of Availability of the Environmental Assessment for the Proposed Northern Lights 2009–2010 Zone EF Expansion Project

February 27, 2009.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline facilities proposed by Northern Natural Gas Company (Northern) in the above-referenced docket.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The EA assesses the potential environmental effects of the construction and operation of the proposed pipeline facilities including:

- An approximately 6.37-mile-long extension of the 30-inch-diameter Faribault-Farmington D-Line in Rice and Dakota Counties, Minnesota;
- An approximately 6.06-mile-long extension of the 20-inch-diameter

Farmington-North Branch C-Line in Washington County, Minnesota;

- An approximately 6.04-mile-long extension of the 20-inch-diameter Elk River loop in Anoka County, Minnesota;

- The replacement of approximately 9.32 miles of the 3- and 2-inch-diameter Rockford Branch Line with 22.95 miles of 16-inch-diameter pipeline in Carver, Wright, and Hennepin Counties, Minnesota;

- An approximately 11.21 miles of the 16-inch-diameter greenfield Corcoran Branch Line in Hennepin County, Minnesota;

- A new 15,000 horsepower ISO-rated greenfield compressor station located near Albert Lea, Minnesota in Freeborn County, Minnesota; and

- A new meter station in Hennepin County, Minnesota.

Northern proposes to expand the capacity of its facilities in these areas to transport an additional 135,000 decatherms per day of natural gas for incremental firm winter service.

The EA has been placed in the public files of the FERC. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street, NE., Room 2A, Washington, DC 20426, (202) 502–8371.

Copies of the EA have been mailed to federal, state and local agencies, public interest groups, interested individuals, newspapers, and parties to this proceeding.

Any person wishing to comment on the EA may do so. To ensure consideration prior to a Commission decision on the proposal, it is important that we receive your comments before the date specified below.

Please note that the Commission strongly encourages electronic filing of any comments or interventions or protests to this proceeding.
