

Partnership Area, within which we will have the authority to acquire less-than-fee-title interest of up to 100,000 acres as a Conservation Area.

The Everglades Headwaters NWR and Conservation Area will help to protect and restore one of the great grassland and savanna landscapes of eastern North America, conserving one of the nation's prime areas of biological diversity. It will also help to address the threats from habitat fragmentation and urban development, altered ecological processes, and impacts from global climate change. We will work with willing landowners to create a 100,000-acre Conservation Area through conservation easements or other less-than-fee-title means, and a 50,000-acre national wildlife refuge.

The authorities which established the Everglades Headwaters NWR and Conservation Area are the National Wildlife Refuge System Administration Act [16 U.S.C. 668dd(a)(2)], Endangered Species Act [16 U.S.C. 1534], Emergency Wetlands Resources Act [16 U.S.C. 3901(b), 100 Stat. 3583], Migratory Bird Conservation Act [16 U.S.C. 715d], Fish and Wildlife Act [16 U.S.C. 742f(a)(4)], and Refuge Recreation Act [16 U.S.C. 460k–460k–4].

Working with conservation land managers across this landscape, we will: (1) Manage the refuge and work with the landowners participating in the conservation area to support a more connected and functional conservation landscape that will provide effective habitat connections between existing conservation areas and allow habitats and species to shift in response to urban development pressures and global climate change; (2) provide a wide range of quality Kissimmee River Basin habitats to support migratory birds, Federal- and State-listed species, State-designated species of special concern, and native wildlife diversity; (3) contribute to water quality, water quantity, and water storage capacity of the upper Everglades watershed, to complement Everglades restoration goals and objectives and water quality and supply for central and south Florida; and (4) provide opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation, while increasing knowledge of and support for conservation of the important grassland and savanna landscape of the headwaters of the Everglades.

Several uses were evaluated in the interim compatibility determinations and determined to be compatible for the refuge. These uses include hunting, fishing, environmental education and

interpretation, wildlife observation and photography, research, off-road vehicle use (on designated roads and trails in support of hunting and research), camping, hiking, horseback riding, bicycling, and grazing. We are working with the Florida Fish and Wildlife Conservation Commission to establish a memorandum of understanding to create a State wildlife management area for hunting on properties acquired for the refuge.

On September 8, 2011, we published a **Federal Register** notice (76 FR 55699) announcing the proposed establishment of the Everglades Headwaters National Wildlife Refuge and Conservation Area, and the release for public review and comment of the Draft Land Protection Plan and Draft Environmental Assessment in accordance with National Environmental Policy Act (40 CFR 1506.6 (b)) requirements. On October 26, 2011, we published a **Federal Register** notice (76 FR 66321) announcing the extension of the comment deadline to November 25, 2011.

Based on the documentation in the LPP and EA, we signed a Finding of No Significant Impact and subsequently approved the establishment of the Everglades Headwaters NWR and Conservation Area. Interim compatibility determinations and a Conceptual Management Plan were released with both the draft and final documents. The Conceptual Management Plan will serve as an interim management plan until a Comprehensive Conservation Plan and/or appropriate step-down management plans have been developed.
