

PNDP supports the development and operation of projects to provide patient navigator services to improve health outcomes for individuals with cancer and other chronic diseases, with a specific emphasis on health disparities populations. Award recipients are to use grant funds to recruit, assign, train, and employ patient navigators who have direct knowledge of the communities they serve in order to facilitate the care of those who are at risk for or who have cancer or other chronic diseases, including conducting outreach to health disparities populations.

As authorized by the statute, an evaluation of the outcomes of the program must be submitted to Congress. The purpose of these data collection instruments, including navigated patient data intake, VR-12 health status, patient navigator survey, patient navigator encounter/tracking log, patient medical record and clinic data, clinic rates (baseline measures), quarterly reports, and focus group discussion guides is to provide data to inform and support the Report to Congress for: the quantitative analysis of baseline and benchmark measures;

aggregate information about the patients served and program activities; and recommendations on whether patient navigator programs could be used to improve patient outcomes in other public health areas.

A single instrument, the Client Opinion Form, has been added to this collection, resulting in an increase of 579.2 burden hours.

The annual estimate of burden is as follows:
