The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Application:* Georgia Power Company seeks approval to construct a 615-foot-long rock and concrete weir, with top elevation of 225.5 feet, in the existing tailrace of the North Highland Dam of the Middle Chattahoochee Project. The proposed weir will act to support the tailwater elevation required to continue operating the North Highlands Development once the downstream City Mills Dam licensed by Uptown Columbus is breached. In addition, Georgia Power Company also seeks to construct a permanent access road to the weir and a staging area reserved for future plant

inspection and maintenance of the weir. The proposed action requires that Georgia Power Company move the existing project boundary downstream by 200 feet to accommodate the structure and the proposed safety signage, as well as a new positive boat barrier. With the installation of the tailrace weir, Georgia Power Company is not proposing to change current project operations, so all flows would remain the same as currently authorized by the license for the Middle Chattahoochee Project. During construction of the tailrace weir, Georgia Power Company will, for a short period, divert flows over the North Highlands spillway, not through the powerhouse.
