

to the Office of Management and Budget (OMB) as a revision after this comment period to obtain the three year clearance from them.

In response to the events of September 11, 2001, the Federal Communications Commission (Commission or FCC) created an Emergency Contact Information System to assist the Commission in ensuring rapid restoration of communications capabilities after disruption by a terrorist threat or attack, and to ensure that public safety, public health, and other emergency and defense personnel have effective communications services available to them in the immediate aftermath of any terrorist attack within the United States. The Commission submitted, and OMB approved, a collection through which key communications providers could voluntarily provide contact information.

The Commission's Public Safety and Homeland Security Bureau (PSHSB) updated the Emergency Contact Information system with a Disaster Information Reporting System (DIRS) that uses electronic forms to collect Emergency Contact Information forms

and through which participants may inform the Commission of damage to communications infrastructure and facilities and may request resources for restoration. The Commission updated the process by increasing the number of reporting entities to ensure inclusion of wireless, wireline, broadcast, cable and satellite communications providers.

The Commission is now requesting revision of the currently approved collection. In recent years, communications have evolved from a circuit-switched network infrastructure to broadband networks. The Commission is seeking to extend the Disaster Information Reporting System to include interconnected Voice over Internet Protocol and broadband Internet Service Providers. Increasing numbers of consumers, businesses, and government agencies rely on broadband and interconnected VoIP services for everyday and emergency communications needs, including vital 9-1-1 services. It is therefore imperative that the Disaster Information Reporting System be expanded to include these new technologies in order for the

Commission the gain an accurate picture of communications landscape during disasters. The Commission has revised its DIRS screen shots and is including a copy of the DIRS user manual for which the Commission is requesting OMB approval.

FEDERAL COMMUNICATIONS COMMISSION

Sunshine Act Open Commission Meeting

Date: February 8, 2012.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Wednesday, February 15, 2012 which is scheduled to commence at 10:30 a.m. in Room TW-C305, at 445 12th Street SW., Washington, DC.

Item Nos.	Bureau	Subject
1	Consumer & Governmental Affairs	<i>Title:</i> Rules and Regulations Implementing the Telephone Consumer Protection Act of 1991 (CG Docket No. 02-278) <i>Summary:</i> The Commission will consider a Report and Order that protects consumers from unwanted autodialed or prerecorded calls ("robocalls") by adopting rules that ensure consumers have given prior express consent before receiving robocalls, can easily opt out of further robocalls, and will experience "abandoned" telemarketing calls only in strictly limited instances.
2	Wireless Tele-Communications	<i>Title:</i> Amendment of Parts 1 and 22 of the Commission's Rules With Regard to the Cellular Service, Including Changes in Licensing of Unserved Area (RM 11510); Amendment of the Commission's Rules With Regard to Relocation of Part 24 to Part 27 and Interim Restrictions and Procedures for Cellular Service Applications <i>Summary:</i> The Commission will consider, as part of its ongoing efforts to remove outdated regulations and reduce unnecessary regulatory burdens, a Notice of Proposed Rulemaking and Order proposing a staged approach to revising the licensing model for the Cellular Service from site-based to geographically-based licensing. The proposal will offer greater flexibility and reduce regulatory requirements, while enabling greater rural deployment of wireless service. The item also includes several other proposals to update the Cellular Service rules, as well as interim procedures for Cellular Service applications.
3	Public Safety and Homeland Security	<i>Title:</i> The Proposed Extension of Part 4 of the Commission's Rules Regarding Outage Reporting to Interconnected Voice Over Internet Protocol Service Providers and Broadband Internet Service Providers (PS Docket No. 11-82) <i>Summary:</i> The Commission will consider a Report and Order to extend outage reporting under Part IV of the rules to interconnected Voice over Internet Protocol (VoIP) service providers. Extended reporting will enable the Commission to fulfill statutory E9-1-1 obligations and help protect the growing number of Americans who rely on VOIP phone service.
