The NRC cautions you not to include identifying or contact information that that you do not want to be publicly disclosed in your comment submission. The NRC does not routinely edit comment submissions to remove identifying or contact information.

Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a draft guide in the NRC's "Regulatory Guide" (RG) series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

This RG describes methods that the NRC staff considers acceptable for complying with the provision of part 50 of Title 10 of the *Code of Federal Regulations* (10 CFR) "Domestic

Licensing of Production and Utilization Facilities," 10 CFR 50.34(b)(6)(ii), Contents of applications; technical information, and 10 CFR Part 52 "Licenses, Certifications, and Approvals for Nuclear Power Plants," 10 CFR 52.79(a)(27), Contents of applications; technical information in final safety analysis report. Both sections require compliance with 10 CFR Part 50, Appendix B, "Quality Assurance Criteria for Nuclear power Plants and Fuel Reprocessing Plants," which, in part, requires the establishment of Quality Assurance (QA) controls for the implementation of managerial and administrative controls to assure safe operation.

The draft regulatory guide, entitled, "Quality Assurance Program Requirements (Operations)," is temporarily identified by its task number, DG-1300. The DG-1300 is proposed revision 3 of Regulatory Guide 1.33, dated February 1978.

This revision (Revision 3) of RG 1.33 endorses ANSI/ANS 3.2-2012, "Managerial, Administrative, and Quality Assurance Controls for Operational Phase of Nuclear Power Plants," which is an update to the standard that was endorsed in Revision 2, ANSI 3.2/ANSI N18.7-1976, "Administrative Controls and Quality Assurance for the Operational Phase of Nuclear Power Plants." The updated standard incorporates operational experience since the original standard was developed, and is better focused on QA of plant operations because information on QA of design and construction was moved to another standard. The NRC staff has reviewed ANSI/ANS 3.2-2012 and determined that the revised standard provides acceptable guidance on QA of plant operations. The staff's review is documented in the ANSI 3.2 Side-By-Side Comparison (ML12276A076).

III. Backfitting and Issue Finality

Issuance of this final regulatory guide does not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) and is not otherwise inconsistent with the issue finality provisions in 10 CFR Part 52. As discussed in the "Implementation" section of this regulatory guide, the NRC has no current intention to impose this regulatory guide on holders of current operating licenses or combined licenses.

This regulatory guide may be applied to applications for operating licenses and combined licenses docketed by the NRC as of the date of issuance of the final regulatory guide, as well as future applications for operating licenses and combined licenses submitted after the

issuance of the regulatory guide. Such action does not constitute backfitting as defined in 10 CFR 50.109(a)(1) or is otherwise inconsistent with the applicable issue finality provision in 10 CFR part 52, inasmuch as such applicants or potential applicants are not within the scope of entities protected by the Backfit Rule or the relevant issue finality provisions in part 52.

Dated at Rockville, Maryland, this 25th day of January 2013.

For the Nuclear Regulatory Commission.

Chief, Regulatory Guide Development Branch, Division of Engineering, Office of Nuclear Regulatory Research.
