## NUCLEAR REGULATORY COMMISSION

[NRC–2014–0040]

### Monitoring of Neutron-Absorbing Materials in Spent Fuel Pools

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Draft generic letter; public meeting and request for comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is issuing this draft generic letter to address degradation of neutron-absorbing materials in the spent fuel pool (SFP). The NRC has determined that it is necessary to obtain plant-specific information requested in the draft generic letter so that the NRC can determine if the degradation of the neutron-absorbing materials in the SFP is being managed to maintain reasonable assurance that the materials are capable of performing their intended safety function, and if the licensees are in compliance with the regulations.

**DATES:** Submit comments by May 12, 2014. Comments received after this date will be considered if it is practical to do so, but the Commission is able to assure consideration only for comments received on or before this date.

**ADDRESSES:** You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

- **Federal Rulemaking Web site:** Go to <http://www.regulations.gov> and search for Docket ID NRC–2014–0040. **II. Discussion**

The NRC is issuing Generic Letter NRC–2014–0040, “Monitoring of Neutron-Absorbing Materials in Spent Fuel Pools,” (ADAMS Accession No. ML13100A086) to request submittal of information from the stated licensees regarding the credited neutron-absorbing materials in the spent fuel pool (SFP) and associated surveillance or monitoring programs. Recent operating experience and regulatory actions have shown some gaps in the NRC knowledge base and regulatory guidance associated with management of the effects of aging on the neutron-absorbing materials in the SFP. Follow-up investigations of the identified gaps resulted in some NRC concerns with existing methods used in the industry to ensure compliance with the nuclear criticality safety (NCS) requirements in § 50.68 of Title 10 of the *Code of Federal Regulations* (10 CFR) and in General Design Criterion 62 (found in Appendix A of 10 CFR Part 50). In light of recent findings related to neutron-absorbing material degradation and uncertainties in the tools used to monitor the current condition of neutron-absorbing materials in the SFP, the NRC decided to request detailed information in order to verify compliance with the applicable NCS requirements and to determine if any further regulatory action is necessary. The draft generic letter contains a more detailed discussion of the issues involved and the information being requested.

**III. Cumulative Effects of Regulation**

The NRC is considering the cumulative effects of regulation (CER) as they relate to this Generic Letter. The CER considers the challenges licensees face in addressing the implementation of new regulatory positions, programs, and requirements (e.g., rulemaking, guidance, backfits, inspections). The CER initiative stems from the total burden imposed on licensees by the NRC from simultaneous or consecutive regulatory actions that can adversely affect the licensee's capability to implement those requirements while continuing to operate or construct its facility in a safe and secure manner. The NRC proposed several rulemaking

process enhancements to address CER in SECY–11–0032, “Consideration of the Cumulative Effects of Regulation in the Rulemaking Process,” dated October 11, 2011 (ADAMS Accession No. ML112840466). In SECY–12–0137, “Implementation of the Cumulative Effects of Regulation Process Changes,” dated October 5, 2012 (ADAMS Accession No. ML12223A162) built upon the recommendations in SECY–11–0032. In its Staff Requirements Memorandum to SECY–12–0137 (ADAMS Accession No. ML13071A635), the Commission directed the staff to, among other items, “continue to develop and implement outreach tools that will allow NRC to consider more completely the overall impacts of multiple rules, orders, generic communications, advisories, and other regulatory actions on licensees and their ability to focus effectively on items of greatest safety importance.”

With regard to this generic letter, the NRC requests that licensees comment about any CER challenges they may face. Specifically, the NRC requests comment on the following questions:

- a. In light of any current or projected cumulative effects, does this generic letter request provide sufficient time for licensees to respond with the information requested, including any need to develop this information through supporting engineering calculation or analyses?

- b. If a current or projected cumulative effect poses a significant challenge, what should be done to address it? For example, if more time is required to develop and provide the information, what period of time is sufficient? Are there equally effective alternatives to providing the requested information to the NRC that reduce the cumulative effects?

- c. Do other (NRC or other regulatory agency) regulatory actions (e.g., Orders, rules, generic letter, bulletins, 50.54(f) requests) influence licensee responses to this draft generic letter? If so what are they and do you have a suggested approach to reduce the cumulative effects in light of these other regulatory actions?

- d. Are there other projects that licensees are undertaking, plan to undertake, or should be undertaking that provide greater safety benefit, that might be displaced or delayed as a result of the expenditure of effort and resources to respond to this generic letter?

- e. Are there unintended consequences associated with responding to this generic letter at this time?

f. Please comment on the NRC's supporting justification for this generic letter.

#### IV. Public Meeting

The NRC plans to hold an informational public meeting approximately 45 days into the public comment period to discuss draft Generic Letter NRC-2014-0040, "Monitoring of Neutron-Absorbing Materials in Spent Fuel Pools", and to obtain feedback from members of the public. The public meeting will be transcribed by a court reporter. The public meeting notice will be made available electronically in ADAMS and posted on the NRC's Public Meeting Schedule Web site at <http://www.nrc.gov/public-involve/public-meetings/index.cfm>. The agenda for the public meeting will be noticed no fewer than 10 days prior to the meeting on the Public Meeting Schedule Web site. Any meeting updates or changes will be made available on this Web site. Information regarding topics to be discussed, changes to the agenda, whether the meeting has been cancelled or rescheduled, and the time allotted for public comments can be obtained from the Public Meeting Schedule Web site. Comments regarding the draft Generic Letter must be submitted in accordance with paragraph I.B of this document. Comments from the public meeting will not be considered as official comments to this **Federal Register** notice.

Dated at Rockville, Maryland, this 27th day of February, 2014.

For the Nuclear Regulatory Commission.
