The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by modifying Class E airspace at Hulett Municipal Airport, Hulett, WY, to accommodate RNAV (GPS) standard instrument approach procedures at Hulett Municipal Airport, Hulett, WY. Controlled airspace would extend upward from 700 feet above the surface within an 8.3-mile radius of the airport; and from 1,200 feet above the surface within prescribed parameters. This action would enhance the safety and management of aircraft operations at the airport.

Class E airspace designations are published in paragraph 6005, of FAA Order 7400.9X, dated August 7, 2013, and effective September 15, 2013, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation; (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic impact on a

substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify controlled airspace at Hulett Municipal Airport, Hulett, WY.

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a revision to the Texas State Implementation Plan (SIP) for the Dallas/Fort Worth ozone nonattainment area to recategorize a local environmental speed limit control measure to a transportation control measure. Approval and Promulgation of Implementation Plans; Tennessee; Conflict of Interest and Notice of Finding of Disapprovals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule and notice of disapproval.

SUMMARY: EPA is taking three actions pertaining to the infrastructure requirements of the Clean Air Act (CAA or Act) for the State of Tennessee. First, EPA is providing notice of its findings of disapproval for a sub-element of the Tennessee infrastructure state implementation plans (SIPs) for the 2008 Lead National Ambient Air Quality Standards (NAAQS), 1997 Annual Fine Particulate Matter (PM_{2.5}) NAAQS, 2006 24-hour PM_{2.5} NAAQS and 1997 8-hour ozone NAAQS. Specifically, EPA is providing notice of the disapproval of the previously conditionally-approved portion of the State board and conflict of interest requirements of the infrastructure SIPs for these NAAQS. These disapprovals were triggered automatically on July 23, 2013, when Tennessee failed to submit revisions to address the CAA State board and conflict of interest requirements within the timeframes specified in EPA's conditional approval
