GBE VI states that the existing international transmission facilities that it proposes to utilize have been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties. GBE VI states that it will make all necessary commercial arrangements and will obtain all regulatory approvals required to schedule and deliver the proposed exports, including scheduling its transactions with the appropriate balancing authority areas in compliance

with the reliability criteria standards and guidelines established by the North American Reliability Corporation (NERC) and NERC's member regional councils.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR Part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program Web site at <http://energy.gov/node/11845>, or by emailing Angela Troy at Angela.Troy@hq.doe.gov.
