

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 establishes Class E airspace extending upward from 700 feet above the surface within a 9.5-mile radius of Harriman-and-West Airport, North Adams, MA. Controlled airspace is required to support the new RNAV (GPS) standard instrument approach procedures for Robertson Field Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes controlled airspace at Harriman-and-West Airport, North Adams, MA.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures," paragraph 311a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Establishment of Class E Airspace; Bend, OR

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes Class E airspace at Bend, OR, to facilitate vectoring of Instrument Flight Rules (IFR) aircraft under control of Seattle Air Route Traffic Control Center (ARTCC). This action enhances the

safety and management of IFR operations within the National Airspace System (NAS).

DATES: Effective 0901 UTC, April 30, 2015. The Director of the Federal Register approves this incorporation by reference action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

SUPPLEMENTARY INFORMATION:

History

On November 19, 2014 the FAA published in the **Federal Register** a notice of proposed rulemaking (NPRM) to establish Class E en route domestic airspace at Bend, OR (79 FR 68808). Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. One comment was received from the National Business Aviation Association in support of the proposal. Subsequent to publication, the FAA found an inadvertent omission of exclusionary language regarding the 12-mile offshore territorial limit. This action makes the correction.

Class E airspace designations are published in paragraph 6006, of FAA Order 7400.9Y, dated August 6, 2014, and effective September 15, 2014, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.9Y, Airspace Designations and Reporting Points, dated August 6, 2014, and effective September 15, 2014. FAA Order 7400.9Y is publicly available as listed in the **ADDRESSES** section of this final rule. FAA Order 7400.9Y lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 establishes Class E en route domestic airspace extending upward from 1,200 feet above the surface at Bend, OR. By this action, aircraft are contained while in IFR conditions under control of Seattle ARTCC by vectoring aircraft from en route airspace to terminal areas. This action enhances the safety and management of controlled airspace within the NAS.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes controlled airspace at Bend, OR.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1E, "Environmental Impacts: Policies and Procedures," paragraph 311a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Revisions To Support Document Requirements for License Applications Under the Export Administration Regulations

AGENCY: Bureau of Industry and Security, Department of Commerce.

ACTION: Final rule.

SUMMARY: This rule finalizes changes to the support document requirements for license applications submitted to the Bureau of Industry and Security (BIS) and is part of BIS's retrospective regulatory review under Executive Order 13563. In addition to clarifying and streamlining the support document requirements for license applications in part 748 of the Export Administration Regulations (EAR), this final rule removes the requirement to obtain an International Import Certificate or Delivery Verification in connection with a license application and limits the requirement to obtain a Statement by Ultimate Consignee and Purchaser to exports, reexports, and transfers (in-country) of 600 Series Major Defense Equipment. Revisions to the EAR affecting BIS's participation in issuing documents for the Import Certificate and Delivery Verification system for imports into the United States will be addressed in a future final rule, as will potential substantive changes to information collections under the Paperwork Reduction Act.

DATES: This rule is effective March 13, 2015.

SUPPLEMENTARY INFORMATION:

Background

On April 9, 2014, the Bureau of Industry and Security (BIS) published a proposed rule (79 FR 19552) (hereinafter, the "April 9 rule") to revise the support document requirements of the Export Administration Regulations (EAR). This proposed rule was part of BIS's retrospective regulatory review being undertaken under Executive
