Abstract: Air Stationary Source Compliance and Enforcement Information Reporting is an activity whereby State, Local, Tribal, Territorial and Commonwealth governments (hereafter referred to as "delegated agencies") report air stationary source compliance and enforcement information to the U.S. Environmental Protection Agency (the EPA or the Agency) on a regular basis. The information is provided to the EPA via input to the Integrated Compliance Information System (ICIS). ICIS replaced the Air Facility System (AFS) as the database of record for this information. The modules within ICIS that are used to report Air related data are collectively referred to as ICIS-Air. The majority of delegated agencies maintain their own data systems and extract data from it and report it to ICIS either electronically or manually. A small number of delegated agencies use ICIS as their only data system. The information provided to the EPA includes source information, compliance monitoring activities, violation determinations, and enforcement activities. The EPA uses this information to assess the health of the compliance and enforcement program established under the Clean Air Act (CAA).

Form Numbers: None.

Respondents/affected entities: The respondents for the information collection activity are state, local, territorial, and tribal delegated agencies. These agencies are classified in NAICS

924110. Source compliance data assembled by delegated agencies covers numerous NAICS categories. The total number of respondents is 99 (50 states, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Mariana Protectorate and 43 local air pollution control agencies).

Respondent's obligation to respond: Mandatory. The CAA calls for state, local, federal and tribal governments to implement the Act in partnership to reduce pollution. It is well understood that working closely with government partners leads to better programs that are more effective and efficient. For regulatory programs, EPA often has discussions early in the rulemaking process with government partners (federal, state, local and tribal) and with interested parties such as affected industries, environmental groups, and communities. After a rule is complete, EPA works with government partners and stakeholders to achieve effective implementation. This ICR supports the partnership established for CAA program implementation by facilitating regular information exchange. Section 114(a)(1) of the CAA, 42 U.S.C. 7414(a)(1), establishes that EPA may request information on a one-time, periodic or continuous basis for the purpose of carrying out any provision of the Act. Individually, certain provisions of the Act and its implementing regulations include specific language for the collection of some of the information requested by this ICR. For example, 110(p) of the CAA, 42 U.S.C. 7410(p), establishes that EPA may request information to assess the implementation of any state implementation plan. 40 CFR 70.4(j)(1) (title V) requires that any information obtained or used in the administration of a title V permit program be available to EPA. This ICR encompasses this information in addition to information that assists with carrying out additional provisions of the Act. Related provisions include but are not limited to New Source Performance Standards (NSPS) in 40 CFR part 60, National Emission Standards for Hazardous Air Pollutants (NESHAP) in 40 CFR part 61 and part 63, and New Source Review (NSR) permitting regulations in 40 CFR part 51 and part 52. The periodic reporting of regulated source information, compliance monitoring, violation determination, and enforcement information is the subject of this renewal ICR.

Estimated number of respondents: 99.

Frequency of response: Every 60 days at minimum.

Total estimated burden: 51,413 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$2,688,900 (per year).

Changes in the Estimates: There is a decrease of 2,971 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is as a result of slight shifts in the distribution of agencies by size, due to a continued reduction in the universe of major air sources.

Courtney Kerwin,

Acting Director, Collection Strategies Division.
