

discussed during numerous public meetings between the NRC and industry.

III. Backfitting and Issue Finality

This draft regulatory guide would approve for use updated industry guidance for ITAAC closure, including the different kinds of ITAAC notifications required by 10 CFR 52.99. Issuance of this regulatory guide in final form would not be inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the "Implementation" section of this regulatory guide, the NRC has no current intention to impose this draft regulatory guide on current holders of combined licenses. In addition, the matters in this draft regulatory guide do not appear to be within the matters subject to issue finality protection under 10 CFR 52.83 or 10 CFR 52.98.

Therefore, any imposition of this draft regulatory guide on current holders of combined licenses, or current and future applicants for combined licenses, would not be inconsistent with any issue finality protection under 10 CFR 52.83 or 10 CFR 52.98.

Dated at Rockville, Maryland, this 29th day of December, 2014.

For the Nuclear Regulatory Commission.

Harriet Karagiannis,

Acting Chief, Regulatory Guide and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.
