Abstract: The Institute of Education Sciences (IES) within the U.S. Department of Education is proposing data collection activity as part of the What Works Clearinghouse Feedback Task. The task and its associated efforts are being undertaken by the U.S. Department of Education, Institute of Education Sciences (IES), and is being conducted by Mathematica Policy Research. The intended purpose of the Department of Education (ED), Institute of Education Sciences (IES) WWC feedback task is to collect feedback from users on the relevance, timeliness, quality, and ease of use of the products associated with the What Works Clearinghouse Web site. The results of the data collection will be used to inform improvements in ED program products and services for its customers. The WWC provides educators, policymakers, and the public with a central and trusted source of scientific evidence of what works in education. The WWC aims to make findings from education research easy and accessible through its searchable online repository of intervention reports, single study reviews, and practice guides. There are thousands of empirical studies that claim to identify effective instructional approaches, many using complicated research methods and statistical analyses. This research often yields conflicting results, leaving educators wondering which approach to take. Given the large volume of education research and significant variation in quality, principals and other educators need help identifying reliable research and interpreting findings. Using systematic review processes and evidence standards, the WWC reviews all the research on a topic to identify the most rigorous studies and synthesize the findings from high-quality education research. The WWC has developed three new products that focus on utilizing the WWC and the WWC resources when making key decisions in education. First, the WWC will produce and is developing several videos that describe the purpose of the WWC or how to understand specific materials on the Web site. For example, the WWC has already released a video that addresses how to select a mathematics curriculum. The WWC also developed practice guide summaries which consolidate the

information from practice guides into an 8–10 page summary that presents expert recommendations from the field, along with tips on implementing the recommendations. The WWC has already released two of these summaries—Teaching Math to Young Children and Teaching Elementary School Students to Be Effective Writers. Finally, topical blasts consolidate WWC content relevant to a specific education topic. Emails direct users to a dedicated landing page containing links to the relevant content. Findings from the case studies of these topics will be used to improve these and other WWC products going forward. The WWC feedback task will include the following data collection methods: focus groups with WWC users, user feedback web surveys, and data analytics.

DEPARTMENT OF ENERGY

Proposed Subsequent Arrangement

AGENCY: Office of Nonproliferation and Arms Control, Department of Energy.

ACTION: Proposed subsequent arrangement.

SUMMARY: This document is being issued under the authority of the Atomic Energy Act of 1954, as amended. The Department is providing notice of a proposed subsequent arrangement under the Agreement for Cooperation Between the Government of the United States of America and the Government of the Argentine Republic Concerning Peaceful Uses of Nuclear Energy and the Agreement Between the Government of the United States of America and Australia Concerning Peaceful Uses of Nuclear Energy.

DATES: This subsequent arrangement will take effect no sooner than July 17, 2015.

FOR FURTHER INFORMATION CONTACT: Ms. Katie Strangis, Office of Nonproliferation and Arms Control, National Nuclear Security Administration, Department of Energy. Telephone: 202-586-8623 or email: Katie.Strangis@nnsa.doe.gov.

SUPPLEMENTARY INFORMATION: This subsequent arrangement concerns the retransfer of 85,758 g of U.S.-origin uranium, 16,946 g of which is in the isotope of U-235 (19.76 percent enrichment), in the form of low enriched uranium-silicide Open Pool Australian Lightwater (OPAL) research reactor fuel clad in aluminum, from the Australian Nuclear Science and Technology Organisation (ANSTO) in Lucas Heights, Sydney, Australia, to the Deposito de Materiales Nucleares (DEMANU) and/or Deposito de Uranio Enriquecido (DUE) warehouses of Comision Nacional de Energia Atomica (CNEA) in Buenos Aires, Argentina. The material, which is currently located at ANSTO's OPAL reactor, will be transferred to the CNEA DEMANU and/or DUE warehouses for storage and subsequent use in Argentine research reactors. ANSTO originally obtained the material pursuant to export license XSNM03282, Amendment No. 01, and export license XSNM03348, Amendment No. 01.

In accordance with section 131a. of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement concerning the retransfer of nuclear material of United States origin will not be inimical to the common defense and security of the United States of America.

Dated: June 8, 2015.
