

Regulation NMS, extending the exemption is appropriate in the public interest and consistent with the protection of investors.

Therefore, it is hereby ordered that, pursuant to Rule 612(c) of Regulation NMS, the Exchange is granted an extension of the limited exemption from Rule 612 of Regulation NMS that allows the Exchange to accept and rank orders priced equal to or greater than \$1.00 per share in increments of \$0.001, in connection with the operation of its RPI Program, until December 1, 2016.

The limited and temporary exemption extended by this Order is subject to modification or revocation if at any time the Commission determines that such action is necessary or appropriate in furtherance of the purposes of the Act. Responsibility for compliance with any applicable provisions of the Federal securities laws must rest with the persons relying on the exemption that are the subject of this Order.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76488; File No. SR-C2-2015-032]

Self-Regulatory Organizations; C2 Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Technical Disconnect Mechanism

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 9, 2015, C2 Options Exchange, Incorporated (the “Exchange” or “C2”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 6.48 related to the Exchange’s Technical Disconnect Mechanism. The text of the proposed rule change is provided below. (additions are *italicized*; deletions are [bracketed])

C2 Options Exchange, Incorporated

Rules

* * * * *

Rule 6.48. Technical Disconnect

(a) When a CBOE Application Server (“CAS”) loses communication with a Client Application such that a CAS does not receive an appropriate response to a Heartbeat Request within “x” period of time, the Technical Disconnect Mechanism will automatically logoff the Permit Holder’s affected Client Application and [, if applicable, will] automatically cancel all the Permit Holder’s Market-Maker quotes, *if applicable, and open orders with a time-in-force of “day” (“day orders”), if the Permit Holder enables that optional service*, posted through the affected Client Application. The following describes how the Technical Disconnect Mechanism works for each of the Exchange’s application programming interfaces (“APIs”):

(i) *CBOE Market Interface 2.0 (“CMi 2”) API*. A CAS shall generate a Heartbeat Request to a Client Application (i) after the CAS does not receive any messages from a particular Client Application for “n” period of time or (ii) after every “n” period of time. A Permit Holder shall determine the value of “n.” In no event shall “n” be less than three (3) seconds or exceed twenty (20) seconds. If a CAS generates a Heartbeat Request only after it does not receive any messages from a particular Client Application for “n” period of time, the value of “x” shall be set at a half (.5) second. If a CAS generates a Heartbeat Request every “n” period of time, the value of “x” shall be equal to the value of “n.”

(ii) *Financial Information eXchange (“FIX”) Protocol API*. A CAS shall generate a Heartbeat Message to a Client Application after the CAS does not receive any messages from a particular Client Application for “n” period of time. If the CAS does not receive a response to the Heartbeat Message from the Client Application for “n” period of time, the CAS shall generate a Heartbeat Request to the Client Application. A Permit Holder shall determine the value of “n” at logon. In no event shall “n”

be less than five (5) seconds. The value of “x” shall be equal to the value of “n.”

(b) The Technical Disconnect Mechanism is enabled for all Permit Holders and may not be disabled by Permit Holders, *except the automatic cancellation of a Permit Holder’s day orders is an optional service that the Permit Holder may enable or disable through the API.*

(c) The trigger of the Technical Disconnect Mechanism is event- and Client Application- specific. The automatic cancellation of a Market-Maker’s quotes *(if applicable) or a Permit Holder’s day orders (if enabled by the Permit Holder)* entered into a CAS via a particular Client Application will neither impact nor determine the treatment of the quotes of the same or other Market-Makers *or orders of the same Permit Holder* entered into the CAS via a separate and distinct Client Application. *Except for day orders the Technical Disconnect Mechanism automatically cancels if a Permit Holder enables that optional service*, [T]he Technical Disconnect Mechanism will not impact or determine the treatment of orders a Permit Holder previously entered into the CAS.

. . . Interpretations and Policies:

.01 No change.

The text of the proposed rule change is also available on the Exchange’s Web site (<http://www.c2exchange.com/Legal/>), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 6.48 related to the Exchange’s Technical Disconnect Mechanism. Rule 6.48(a) provides that when a CBOE

⁶ 17 CFR 200.30-3(a)(83).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

Application Server (“CAS”)³ loses communication with a Client Application⁴ such that a CAS does not receive an appropriate response to a Heartbeat Request⁵ within “x” period of time, the Technical Disconnect Mechanism will automatically logoff the Permit Holder’s affected Client Application. If that occurs, the current rule provides that the Technical Disconnect Mechanism, if applicable, will automatically cancel all the Permit Holder’s Market-Maker quotes posted through the affected Client Application.⁶ The Technical Disconnect Mechanism is intended to help mitigate the potential risks associated with a loss of communication with a Client Application, such as erroneous or unintended executions for stale quotes that are resting in the C2 book. This mechanism serves to assist a Permit Holder when a technical or system issue occurs, as well as assist the Exchange in maintaining a fair and orderly market.

The proposed rule change provides Permit Holders with an optional service that, if enabled by a Permit Holder, will cause the Technical Disconnect Mechanism to also automatically cancel all the Permit Holder’s open orders with a time-in-force of “day” (“day orders”) posted through the affected Client Application if the CAS loses communication with the Client Application. The proposed rule change amends Rule 6.48(b) to provide that the Permit Holder may enable or disable this optional service through its application programming interface (“API”) (all other aspects of the Technical Disconnect Mechanism continue to otherwise be enabled for all Permit Holders and may not be disabled

by Permit Holders).⁷ The proposed rule change makes corresponding changes to Rule 6.48(c) that indicate the Technical Disconnect Mechanism will automatically cancel a Permit Holder’s day orders (in addition to a Market-Maker’s quotes), if the Permit Holder enables the proposed optional service.⁸ As is the case in the event the Technical Disconnect Mechanism automatically logs a Permit Holder off and cancels its Market-Maker quotes (if applicable), if a Permit Holder enables this proposed optional service, and the Technical Disconnect Mechanism automatically logs a Permit Holder off and cancels the Permit Holder’s day orders due to lost communication with Permit Holder’s Client Application, the Permit Holder may send messages to the CAS to enter new orders once it reestablishes connectivity to the Client Application. In addition, any nonconnectivity will continue to be event- and Client Application-specific. In other words, any cancellation of day orders entered into a CAS via a particular Client Application will neither impact nor determine the treatment of the quotes of the same Permit Holder entered into a CAS via a separate and distinct Client Application. The Technical Disconnect Mechanism will not impact or determine the treatment of orders previously entered into a CAS if the Permit Holder does not enable this optional service, nor will it impact or determine the treatment of non-day orders previously entered into a CAS by the Permit Holder. The Exchange notes use of this service will be voluntary and within the sole discretion of each Permit Holder.

The proposed optional service is an additional preventative risk control measure that C2 is making available to Permit Holders. It is intended to help further mitigate the potential risks associated with a loss of communication with a Client Application. While orders may be static in nature and rest in the book, Permit Holders often enter day orders more frequently in response to then-current market conditions. Therefore, if a Permit Holder’s Client Application is disconnected for any period of time, it is possible that market conditions upon which it based its day orders may change during that time and make those orders stale. Consequently,

any resulting executions of those orders may be erroneous or unintended. The Exchange believes it is appropriate to limit this optional service to day orders and exclude good-til-cancelled orders,⁹ as those orders are intended to rest in the book for a period of time and thus have lower risk of erroneous or unintended executions during and after the Technical Disconnect Mechanism logs off a Permit Holder.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.¹⁰ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹¹ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹² requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the proposed rule change helps maintain a fair and orderly market and protects investors and the public interest. The Technical Disconnect Mechanism is a valuable tool that is designed to help maintain a fair and orderly market. The Exchange believes that providing Permit Holders with the option to have the Technical Disconnect Mechanism cancel its day orders, in addition to Market-Maker quotes (if applicable), further mitigates the potential risks associated with a loss in communication with a Client Application. The Exchange believes it is reasonable to offer to cancel only day orders. Unlike non-day orders, day orders are more likely to be reflective of then-current market conditions and are intended to rest in the book for a limited period of time. As a result, in the event

³ C2 currently has numerous CASs serving Permit Holders.

⁴ For relevant purposes, a “Client Application” is the system component, such as a C2-supported workstation or a Permit Holder’s custom trading application, through which a Permit Holder communicates its quotes and/or orders to a CAS. Messages are passed between a Client Application and a CAS. A Market-Maker may send quotes to the Exchange from one or more Client Applications, and a Permit Holder may send orders to the Exchange from one or more Client Applications.

⁵ A “Heartbeat Request” refers to a message from a CAS to a Client Application to check connectivity and which requires a response from the Client Application in order to avoid logoff. The Heartbeat Request acts as a virtual pulse between a CAS and a Client Application and allows a CAS to continually monitor its connection with a Client Application. Failure to receive a response to a Heartbeat Request within the Heartbeat Response Time is indicative of a technical or system issue.

⁶ See Rule 6.48 and Securities Exchange Act Release No. 34-70112 (August 5, 2013), 78 FR 48738 (August 9, 2013) (SR-C2-2013-029) for further information regarding the Technical Disconnect Mechanism.

⁷ C2 currently makes available two APIs: CBOE Market Interface 2.0 (“CMI 2”) and Financial Information eXchange Protocol (“FIX”).

⁸ In addition, the proposed rule change makes nonsubstantive changes to Rule 6.48 including moving the phrase “if applicable” to ensure that phrase clearly applies to the cancellation of a Market-Maker’s quotes (as that functionality only applies to Permit Holders that are Market-Makers).

⁹ Currently, the Exchange offers two time-in-force order types: day and good-til-cancelled. The proposed optional service will apply to orders that include the “day” marking.

¹⁰ 15 U.S.C. 78f(b).

¹¹ 15 U.S.C. 78f(b)(5).

¹² *Id.*

that a CAS loses connectivity with a Client Application, execution of day orders during that time are more likely to result in erroneous or unintended executions, while risk of such executions is lower for non-day orders. The proposed optional service protects Permit Holders from these potential erroneous or unintended executions, as well as protects investors and the efficiency and fairness of the markets in general. The Exchange believes this functionality enhances the overall market quality for options traded on C2. The Exchange notes that other exchanges offer their members similar services that cancels a member's orders if it disconnects from the exchange.¹³

The Exchange also believes that the proposed rule change is designed to not permit unfair discrimination among market participants. Use of the optional service will be voluntary and within the sole discretion of each Permit Holder. The proposed optional service is available to all Permit Holders and will apply to the same order types of all Permit Holders.

B. Self-Regulatory Organization's Statement on Burden on Competition

C2 does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange does not believe the proposed rule change will cause any burden on intramarket competition because the optional service will be available to all Permit Holders. Use of this optional service will be within the sole discretion of each Permit Holder. The proposed rule change will have no impact on Permit Holders that do not enable the proposed optional service. For Permit Holders that elect to enable the proposed optional service, the only impact on those Permit Holders will be cancellation of day orders (in addition to Market-Maker quotes) upon loss of connectivity. The Technical Disconnect Mechanism will otherwise continue to function in the same manner as it does today. Further, the Exchange does not

believe that such change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change modifies a mechanism available on C2's system and applies only to orders entered on C2. The Exchange notes that, should the proposed change make C2 a more attractive place for trading, market participants trading on other exchanges are welcome to become Permit Holders and trade at C2 if they determine that this proposed change has made C2 more attractive or favorable. Additionally, as discussed above, other options exchanges offer their members similar functionality.¹⁴

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁵ and paragraph (f) of Rule 19b-4¹⁶ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-C2-2015-032 on the subject line.

¹⁴ *Id.*

¹⁵ 15 U.S.C. 78s(b)(3)(A).

¹⁶ 17 CFR 240.19b-4(f).

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-C2-2015-032. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-C2-2015-032 and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁷

Robert W. Errett,
Deputy Secretary.
